Key Takeaways

The cost of a recharge meter distribution box typically ranges from $600 to $12,000+, depending on specifications, amperage, phase type, and installation requirements.

Residential Meter Boxes

For standard residential installations, electrical meter boxes generally cost between $600 and $2,000, with most projects falling around $1,000–$1,400. Higher-capacity units, such as 200A-rated or outdoor-weatherproof boxes, are positioned at the upper end of this range due to heavier-duty sockets, larger conductors, and weatherproof enclosures. Installation costs, permits, and inspections are additional factors that influence the total price.

Industrial and Custom Enclosures

For industrial or custom meter boxes, prices can rise significantly, ranging from $2,500 to $12,000+. These units often include CT compartments, test switches, bypass mechanisms, and revenue-grade metering systems. Material construction (stainless steel, fiberglass, or NEMA-rated enclosures), corrosion resistance, and compliance with UL, NEC, and utility standards are major cost drivers.

Distribution Box Considerations

Distribution boxes serve as central hubs for power distribution and vary in cost based on voltage ratings, amperage capacity, number of circuits, and integrated safety features. Residential units are generally less expensive, while commercial and industrial boxes with smart monitoring, remote control, and digital displays command higher prices. Outdoor-rated or weather-resistant enclosures carry premium pricing compared to indoor units.

Customization and Bulk Orders

Manufacturers like Indo SMC offer customized meter boxes with options for single-phase, three-phase, LTCT, or DTC configurations. Minimum order quantities typically start at 20 pieces, and bulk orders or OEM branding can reduce per-unit costs. Custom features may include busbar modifications, top cable entry, and logo embossing.

Budgeting Tips

Specify amperage (100A, 150A, 200A) and phase type (single or three-phase). Determine indoor vs outdoor installation and weatherproof requirements. Include labor, permits, and inspection fees in the total cost.

Request itemized quotes from suppliers to compare options and confirm compliance with local electrical codes. In summary, a basic residential recharge meter distribution box may cost around $1,000–$1,400, while industrial or custom units can exceed $10,000, depending on specifications, materials, and installation complexity. For precise pricing, contacting manufacturers or distributors with your specific requirements is recommended.
