A comprehensive price list for indoor fiber optic cabling

Overview

Discover the cost of fiber optic cable in this pricing guide. Learn material prices, installation factors, and what impacts total project costs overall.

Key Takeaways

Indoor fiber optic cables typically cost between $0. 09 and $1. 52 per foot for materials, with retail prices ranging from $1 to $6 per foot depending on fiber type, strand count, and cable rating.

Pricing Overview

Wholesale Material Costs: For bulk purchases, indoor fiber optic cables can cost as low as $0. 09 per foot for simple single-strand cables, while higher-count cables (e.g., 24-strand) may reach $1. 00–$1.

52 per foot depending on specifications. Retail Costs: At retail, expect $1 to $6 per foot, with pre-terminated or patch cables costing more due to factory termination and connector type. Fiber Type: Single-mode fiber is generally cheaper, around $0.

10–$0. 50 per foot, while multimode fiber ranges from $0. 30–$1.

00 per foot. Cable Rating: Indoor riser-rated cables are less expensive than plenum-rated cables, which are required for air-handling spaces. Armored indoor cables for harsh environments can cost $0.

50–$5 per foot.

Factors Affecting Price

Strand Count: More strands increase cost proportionally. For example, a 12-strand cable costs about $0. 50 per foot, while a 24-strand cable can reach $1.

00 per foot. Construction and Material: Glass fiber cores offer better performance but are more expensive than plastic optical fiber alternatives.

Connectors and Pre-

Termination: Pre-terminated assemblies and patch cables add to the cost, depending on connector type and number of fibers.

Installation Considerations

While material costs are the primary factor, installation can significantly affect total expenses. Typical indoor installation costs range from $1 to $12 per linear foot, depending on cable length, complexity, and labor rates. For example, a 1,000-foot indoor single-mode run with minimal termination may cost around $2,650–$3,100 including labor, permits, and accessories.

Cost-

Saving Tips

Buy in Bulk: Wholesale purchases reduce per-foot costs. Choose Appropriate Rating: Use riser-rated cables where plenum-rated is not required.

Minimize Pre-

Termination: Factory-terminated cables are convenient but more expensive. Plan Layout Efficiently: Shorter runs and fewer drops reduce both material and labor costs. By considering these factors, you can find the most cost-effective indoor fiber optic cable for your project while ensuring compliance with building codes and performance requirements.
