

AI installation fails to connect to the server

Overview

Common installation issues include problems with dependencies, runtime installation, module installation, and GPU support configuration. Ensure system packages are up-to-date. On Linux/macOS, run `apt-get update` or equivalent before installation. Please describe your issue or request: (tick the boxes after creating this topic): I seem to have a different problem to most. If you see permission errors: `irm` and `iex` are PowerShell aliases. Fix: Open PowerShell and run the `install` command there: After installation. If installation fails, check these common causes: If GPU acceleration isn't working: If specific modules fail to install: Sources: `src/setup`. AI Server: `Hostname = "localhost", // Default Port =`. This looks like either an oddity with Windows Server vs Windows (consumer) or a permissions issue. We only support (and have only tested on) the consumer versions of windows, not the server version.
