APC fiber optic patch cord to LC

Overview

Our fiber patch cable is available in singlemode and multimode cable type, also features a range of fiber optic connectors sc/lc/fc/st/e2000.

Key Takeaways

An LC APC fiber optic patch cord is a singlemode fiber cable with LC connectors on both ends, featuring an angled physical contact (APC) for low back reflection and high-performance optical connections.

Overview

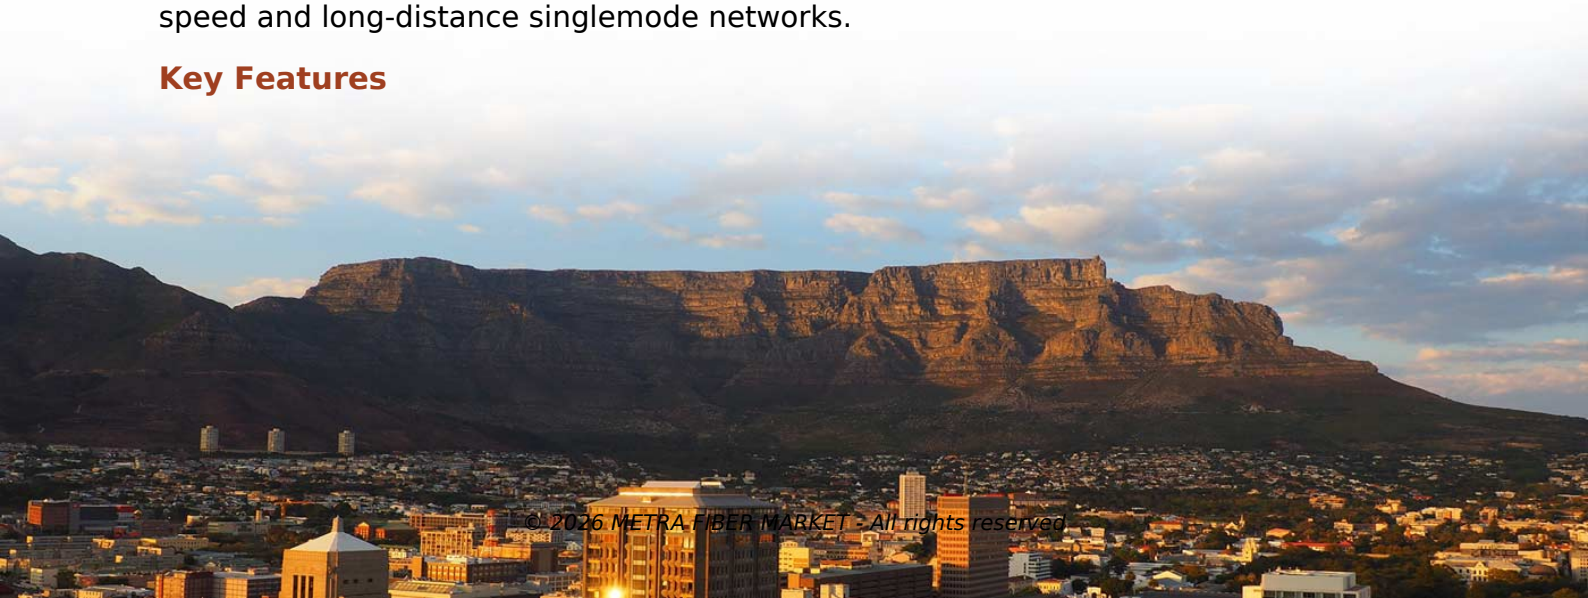

An LC AP

C patch cord is a pre-terminated fiber optic cable designed for non-permanent connections between patch panels, transmission equipment, and other network devices.

The L

C connector is compact, making it ideal for high-density applications, and the APC (Angled Physical Contact) polish reduces back reflection, which is critical for high-speed and long-distance singlemode networks.

Key Features

Connector Type: LC on both ends, APC polish (8° angled ferrule)Fiber Type: Typically singlemode (OS2, 9/125µm), though multimode options exist Cable Construction: Simplex or duplex, with tight-buffered or zipcord designs for flexibility and durability Performance: Low insertion loss, high return loss, and immunity to electrical interference Applications: FTTH, telecom, enterprise networks, data centers, and high-speed Ethernet connections AdvantagesHigh-density compatibility: LC connectors are small, allowing more connections in limited spaceReduced signal reflection: APC angled ferrule minimizes back reflection, improving signal quality in sensitive optical systemsDurability: Pull-proof jackets and robust ferrules protect the fiber during installation and handling Plug & Play: Pre-assembled cords simplify installation and reduce setup time Specifications to ConsiderCable Lengths: Commonly available in 1m, 2m, 3m, 5m, and custom lengths Jacket Material: PVC, LSZH, or riser-rated for indoor useConnector Options: LC/APC to LC/APC, LC/UPC to LC/APC, or other combinations depending on network requirementsTesting: High-quality cords are 100% optically tested for insertion loss and return loss before shipping SummaryAn LC APC fiber optic patch cord is essential for singlemode optical networks where low back reflection and high signal integrity are required.

It is widely used in telecom, FTTH, and data center environments, offering durability, high-density compatibility, and reliable performance. When selecting a patch cord, consider fiber type, connector polish, cable length, and jacket material to match your network requirements.
