Acquiring laser diode manufacturers

Overview

Explore 138 top manufacturers and suppliers of Diode Lasers in our comprehensive photonics buyers' guide. A diode laser is a type of laser that uses a semiconductor diode as the active medium to generate coherent light. Semiconductor diodes are electronic devices that conduct electricity primarily. Innovators in laser diode technology, contributing to a wide range of applications from medical devices to industrial laser systems with cutting-edge advancements. Narrow down on the list of companies based on their location and capabilities. OSI Laser. ProPhotonix has in-house CNC machining facilities and can support you further with your laser requirements, supplying components for your laser diode assembly. Benefit from access to our team's extensive expertise in the manufacture of precision components to the very tight tolerances required for. RP Photonics provides product information from advertisers, but also lists many non-advertising suppliers.
