

Basement cable tray material quotation

Overview

Revised Cable Tray List 16-07-2025 - Free download as PDF File (.pdf), Text File (.txt) or read online for free.

Key Takeaways

You can request a basement cable tray quotation by specifying your tray type, dimensions, material, and accessories through supplier RFQ forms or online estimators. How to Request a QuoteTo obtain a quotation for cable trays suitable for basement installations, you can use supplier-specific Request for Quotation (RFQ) forms. For example, Eaton provides an online RFQ form where you select your country, provide project details, and submit specifications to receive a tailored quote.

Similarly, ABB offers a detailed cable tray quotation guide that outlines the required specifications, including tray sections, fittings, and hardware like splice plates for tees and crosses.

Types of Cable Trays

Cable trays come in light, medium, and heavy-duty options, with widths ranging from 50mm to 600mm and lengths typically 1m or 3m. For basement applications, pre-galvanized steel or hot-dipped galvanized finishes are recommended to prevent corrosion in potentially damp environments. Accessories such as couplers, bends (90° or 45°), tees, crossovers, and lids are available to ensure proper routing and organization of cables.

Estimating and Kits

Some suppliers, like Access Floor Systems, provide complete cable tray kits ready for installation under raised floors or in basements, tailored to your facility's layout. These kits simplify installation and ensure all necessary components are included. Supplier Options and Delivery CMW Ltd offers a wide range of cable trays for commercial and industrial projects, with next-day delivery and free shipping on orders over £100.

Direct Channel provides a full range of cable containment systems with robust accessories and variable risers for flexible routing.

Key Considerations

When requesting a quotation, include: Tray type and duty rating (light, medium, heavy) Dimensions (width, length, height) Material and finish (pre-galvanized, hot-dipped galvanized) Required accessories (couplers, bends, tees, lids) Installation environment (basement, raised floor, indoor/outdoor) Providing these details ensures suppliers can give an accurate and competitive quotation tailored to your basement cable tray requirements.
