Cable tray fixing bracket installation price

Overview

Cable Tray Accessories, Cable Tray Hangers & Support | RSA functional cable tray system consists of various clamping, supporting, and splicing accessories.

Key Takeaways

Cable tray installation costs typically range from $2 to $100 per meter depending on material, type, and installation complexity, while cable tie brackets add additional per-unit costs.

Cable Tray Installation Costs

The cost of installing cable trays varies significantly based on material, type, size, and environmental conditions. Common materials and their approximate price ranges per meter are: Steel (galvanized or pre-galvanized): $5–$25 per meter, widely used for general-purpose installations in residential, commercial, and industrial settings. Aluminum: $6–$30 per meter, lightweight and corrosion-resistant, ideal for humid or industrial environments.

FR

P (Fiberglass Reinforced Plastic): $10–$50 per meter, suitable for aggressive environments where durability is critical. Stainless Steel: $20–$100 per meter, highly durable and corrosion-resistant, used in food, pharmaceutical, or offshore applications. Tray types also affect cost: Ladder trays: Open design, economical for high-density cable installations, allow easy access and ventilation.

Solid-bottom trays: Provide maximum cable protection, slightly more expensive due to material usage and installation requirements. Additional costs include supports, hangers, brackets, and connectors, which are essential for securing trays to walls, ceilings, or raised floors. Labor costs vary by region and complexity, with skilled installation required for proper alignment and safety.

Cable Tie Bracket Costs

Cable tie brackets, used to secure cables within trays or to structural supports, are priced per unit. Costs depend on material (plastic, steel, or stainless steel) and load capacity: Plastic brackets: Low-cost, suitable for light cables. Metal brackets: Higher durability, used for heavy-duty or industrial applications.

Installation: Labor for attaching brackets is typically included in overall tray installation but may add $1–$5 per bracket depending on complexity.

Cost-

Saving Tips

Bulk orders: Purchasing trays and brackets in large quantities can reduce per-meter costs. Material selection: Using pre-galvanized steel or perforated trays instead of ladder trays can save 10–15% without compromising functionality. Efficient layout: Minimizing bends and supports reduces labor and accessory costs.

In summary, a standard cable tray installation with brackets can range from $10 to $50 per meter for typical commercial projects, with higher-end materials or complex installations increasing the cost. Accurate budgeting should consider both material and labor, as well as the number and type of brackets required for secure cable management.
