Cable tray rapid climbing

Overview

Wire mesh tray made of steel with quick-connect Click system and rounded safety edge for the support and management of cables. Of 60 mm height, Width 60 mm, With EZ protection system. The Rejiband® Rapide Cable Tray is made up of wire mesh rods that provide high strength and elasticity. Whether you need hot-dip galvanized steel, stainless steel, or halogen-free plastic systems. At RRI we specialise in a range of patented fall protection systems for electricity transmission & distribution structures that are trusted by electricity transmission and distribution companies and their lineworkers around the world. We have a unique understanding of the height safety challenges. FrenchCreek's cable climbing system offers an innovative solution for vertical climbing that is easy to use, and requires minimal maintenance. The system's stainless steel construction stands up to the elements for extended periods of time, allowing permanent installation. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore.
