Cable tray reinforcement bolts

Overview

The fittings can fastened to the cable tray rail either with double clamps of type DOP A2 or with truss-head bolts of type FRS and combination nuts. The exceptions to this are vertical bends, adjustable bend elements and fittings with a side height of 35 mm. With the RS 60 cable tray installation system, we offer you the last installation type of the standard support construction, so that you can implement all installations required in the building project with circuit integrity maintenance on the basis of the standard support construction. Of course. The M6 x 16mm cable tray bolt & flange nut set provides secure fastening support for cable trays and channel systems with minimal surface obstruction. Our focus has always been on solutions from the field of cable support systems.

Article Content

Mounting instructions

The screw-on cable tray systems are used to support and route all kinds of cables, taking the approved load values into account. Depending on the corrosion protection used, they can be mounted both

Cable Tray
