Cable tray tee cannot be generated

Overview

To solve this issue: Duplicate another cable tray type (do not duplicate the type that doesn't work, as any flaws in that type will also be duplicated); Rename it as needed, and add the appropriate data; Delete the original non-working cable trayTo solve this issue: Duplicate another cable tray type (do not duplicate the type that doesn't work, as any flaws in that type will also be duplicated); Rename it as needed, and add the appropriate data; Delete the original non-working cable trayIs it possible to connect 2 cabletrays with a "branch piece (left picture)" instead of a "tee (right picture)". The tee has 3 connectors, the branch piece only has 1 connector. Delete the original non-working cable tray. If you are not at the branch level in the Model Explorer an error message displays summarising the problem, for example in the following. Cable tray tee fittings are designed to create these branch connections while maintaining cable support, structural continuity, and installation efficiency. Whether distributing power to equipment rooms, routing network cables in a data center, or feeding production machinery in a manufacturing. NOTE : Equal or un equal tees can be supplied. My apps install multiple files to different locations, they are all necessary for the proper operation of the apps.
