Can fiberglass cable trays be customized

Overview

FRP cable trays can be customized by width, height, length, cover type, resin, color, drilled holes, brackets, supports, labels, and packaging. This helps telecom buyers fit tray systems into tight routing spaces or repeated OEM installations. A fiberglass cable tray is an FRP cable support system made with glass fiber reinforcement and a resin matrix. It supports, routes, and protects telecom, electrical, control, or communication cables in industrial and outdoor environments. These structures, typically made from materials such as steel, aluminum, or fiberglass, are designed to support and protect cables, wires. Fiberglass cable trays can be flexibly customized according to cable management requirements, are suitable for complex industrial systems and simple infrastructure projects, and have a high degree of adaptability. Although light in weight, their strength-to-weight ratio surpasses that of equivalent steel products. It is manufactured from fiber reinforced polyester or vinyl ester resin so it has high corrosion resistance, long. GangLong Fiberglass offers a range of cable-management solutions—stainless steel, aluminum, and FRP cable tray —backed by exceptional quality and service.
