

Construction of 144-core optical distribution box

Overview

This 144C modular ODF is composed of 12pcs pre-loaded 12C splicing and patching unit that includes FC/SC/ST/duplex LC compatible adaptors, pigtailed and 12 core splice tray. Integrated design provides OSP cable fibers and pigtail splicing, patch-cord termination and storage. The SJ-ODB-M18-B metal 144 cores fiber distribution box is engineered to provide a robust. Fiber Management Tray also called ODF Distribution Box, Integrated Splicing and Distribution ODF. It is mainly used for cable inlet, grounding and fixing and the splicing between the terminal end and pigtail. The distribution box may be complemented by a bracket, which enables it to be post-mounted. We no longer actively offer this product. 144-port fiber optic. d to meet the demands of modern FTTx and broadband access networks.
