Key Takeaways

The cost of cable tray materials in Myanmar ranges from approximately $2 to $25 per meter, depending on material type, coating, and specifications.

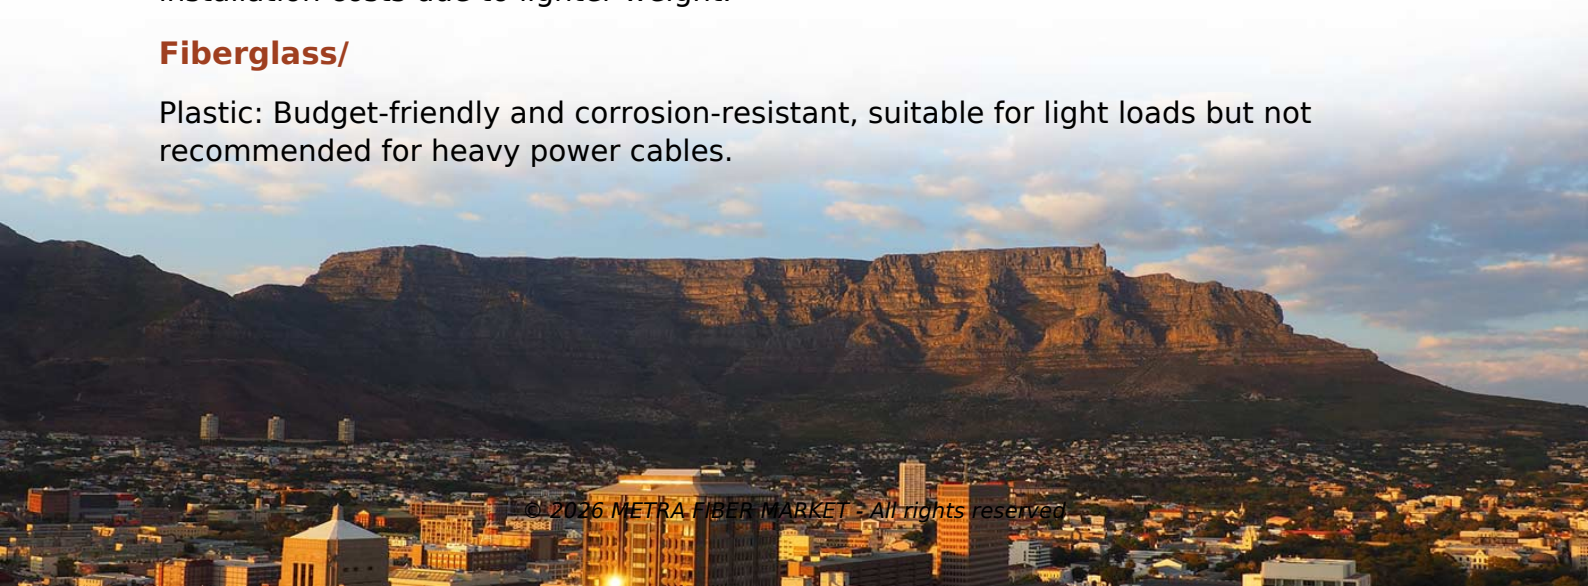

Material Types and Pricing

Galvanized Steel: The most common and cost-effective option, balancing durability and price. Pre-galvanized steel is cheaper and suitable for dry indoor areas, while hot-dip galvanized (HDG) steel is more expensive but ideal for outdoor or corrosive environments due to its thick zinc coating. Stainless Steel: Higher-priced, used in environments requiring corrosion resistance or hygiene, such as food plants or coastal areas.

Aluminum: Lightweight and rust-proof, more expensive than steel, but reduces installation costs due to lighter weight.

Fiberglass/

Plastic: Budget-friendly and corrosion-resistant, suitable for light loads but not recommended for heavy power cables.

Cost Factors

Tray Type: Ladder trays are more expensive but support heavy cables; wire mesh or perforated trays are cheaper and suitable for lighter loads. Coating: HDG and powder-coated trays cost more but offer longer life and corrosion protection. Size and Length: Larger or custom-sized trays increase material costs.

Supplier and Quantity: Bulk orders or local suppliers in Myanmar may reduce per-meter costs. Installation Considerations: While material cost is a major factor, labor and mounting hardware also affect total project cost. Estimated Price RangeLow-end (Pre-Galvanized Steel or Plastic): $2–$5 per meterMid-range (Hot-Dip Galvanized Steel or Aluminum): $8–$15 per meterHigh-end (Stainless Steel or specialized coatings): $20–$25 per meter For precise pricing in Myanmar, it is recommended to contact local suppliers such as Brilltech Engineers or other certified cable tray manufacturers to get a custom quote based on material, tray type, and project requirements.
