Cuba AOC Active Optical Cable OSFP

Overview

OSFP Active Optical Cables (AOCs) are high-speed interconnects for data centers, supporting up to 800 Gbps. Using the OSFP form factor, they offer low power, high signal integrity, and longer reach than copper, making them ideal for AI, HPC, and cloud networking. Our active optical cable assembly portfolio provides improved cable flexibility and longer reach as compared to both traditional passive copper and emerging active copper (ACC/AEC) solutions, supporting high performance computing, data center and networking interconnect applications. Ideal for runs from 7 meters to 100 meters across rows of racks. The cable is compliant wi h SFF-8665 for the QSFP56 pluggable solution. It provides connectivity between system units with a OSFP 400Gb/s connector on one side and two separate QSFP56 200Gb/s connectors on the r pairs of each of the QSFP56 multi t. QSFPTEK 200G AOC portfolio includes QSFP56 and QSFP-DD active optical cables, along with diverse breakout options such as 2×100G, 4×50G, and 8×25G configurations (including LC duplex). Designed for high-speed, longer-reach interconnects, these AOCs deliver low-latency, lightweight, and.
