Custom Data Center Cable Management Rack Quotation

Overview

Choose from a variety of options, including rack sizes, cooling systems, cable management, and finishes, tailored to fit your environment and application.

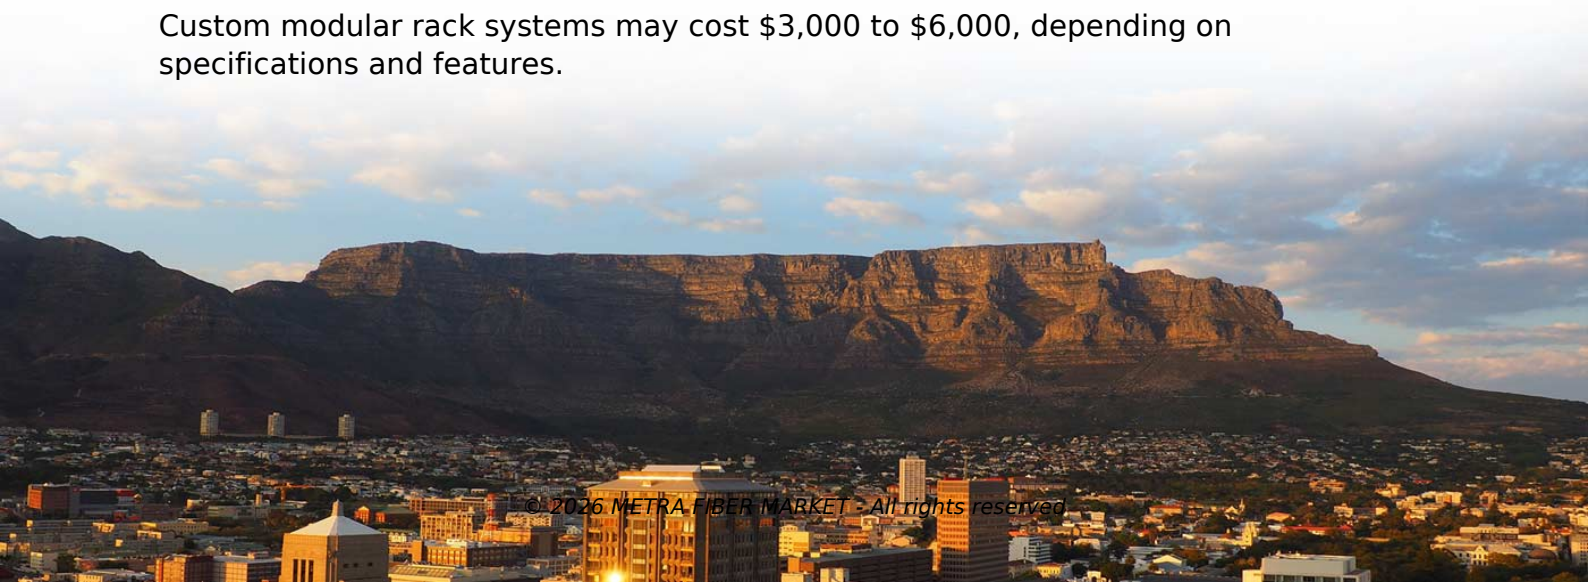

Key Takeaways

Cable management racks for data centers typically range from $200 to $3,000 per rack, depending on complexity and features.

Cost Overview

The cost of cable management racks depends on several factors including rack type, cable management system, power and cooling requirements, and labor: Basic cable management systems (cable trays, ties, simple vertical/horizontal managers) typically cost $200 to $1,000 per rack. Advanced rack-mounted cable management systems with integrated pathways, high-density support, or modular designs range from $1,000 to $3,000 per rack. Rack installation costs vary: standard racks are $500 to $2,000, while high-density or blade server racks can cost $2,500 to $5,000 per rack.

Custom modular rack systems may cost $3,000 to $6,000, depending on specifications and features.

Additional Considerations

Power and Cooling Infrastructure: Power Distribution Units (PDUs) cost $200 to $1,500, UPS systems $1,000 to $10,000, and cooling solutions $500 to $5,000 depending on method and capacity. Labor Costs: Installation labor typically ranges from $50 to $200 per hour, with medium-sized data center setups costing $5,000 to $20,000 in labor. Rack Types and Cable Management Options: Options include vertical and horizontal cable managers, ladder racks, fiber raceways, and open-frame or enclosed racks.

High-density racks and modular enclosures optimize airflow, cable routing, and equipment accessibility.

Total Estimated Costs

Small data center (10–20 racks): $50,000 to $100,000Medium data center (50–100 racks): $200,000 to $500,000Large enterprise data center (200+ racks): $1,000,000+ Recommended SuppliersChatsworth Products: Offers vertical and horizontal cable management solutions for racks and telecom rooms. Belden: Provides flexible, high-density racks, enclosures, and integrated cable management with power and cooling options. Panduit: Offers FlexFusion™ cabinets and comprehensive cable management solutions for high-capacity data centers.

Networks Centre: Supplies cabinets from 12U to 47U with simple cable management for commercial and industrial networks. For an accurate quotation, it is recommended to provide the supplier with rack quantity, type of equipment, cable density, and any special requirements such as seismic compliance, airflow optimization, or integrated power and cooling. This ensures the quote reflects both hardware and installation costs.
