# Customized Mesh Cable Tray Specifications

## Overview

Discover Marlin Steel''s wire mesh cable trays for data centers and other mission-critical applications, including materials used and our competitive advantages.

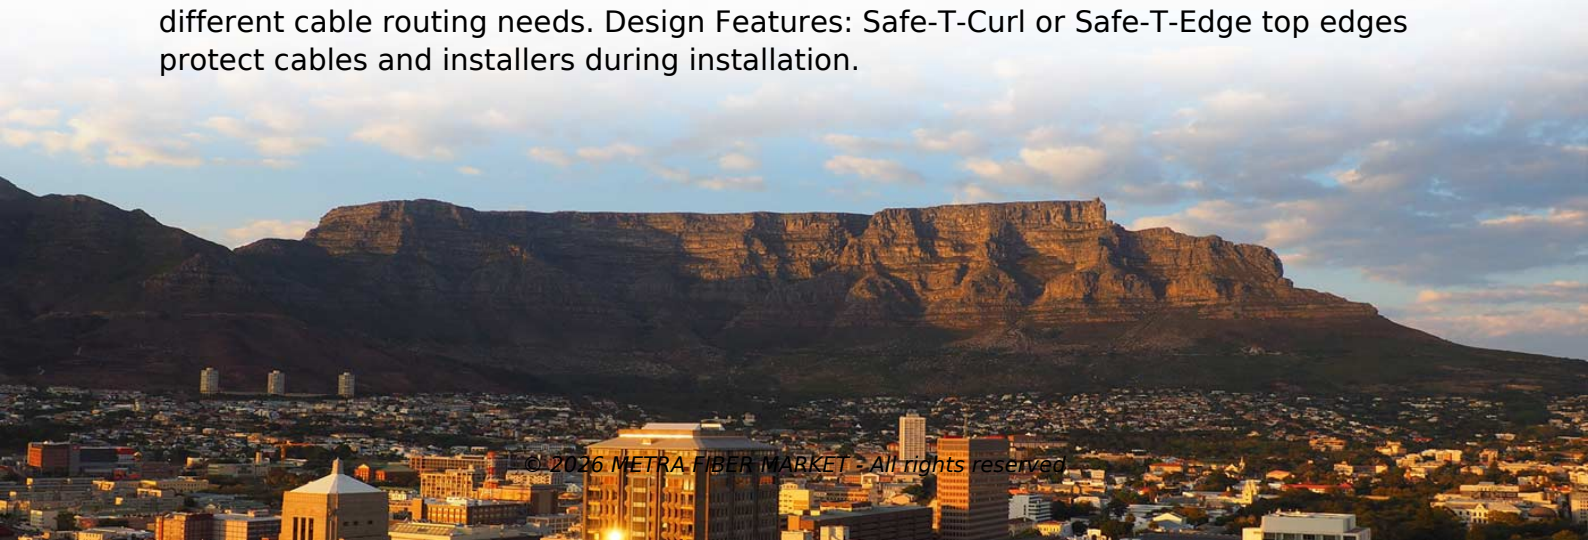

## Key Takeaways

Customized mesh cable trays are available in a variety of materials, sizes, and designs, offering flexible, ventilated, and safe cable management solutions for industrial, data center, and commercial applications.

### Key Specifications

Materials and Finishes: Mesh cable trays are typically constructed from electro-welded steel wires, with options including stainless steel (SS202, SS304, SS316) or galvanized steel for enhanced durability and corrosion resistance. Finishes may include powder coating or bare metal depending on environmental requirements. Dimensions and Customization: Standard widths range from 50mm to 600mm, heights of 50mm or 100mm, and lengths from 1m to 2.

5m, with the ability to match custom drawings for unique project requirements. Mesh trays can be fabricated in U, C, G, or W-shaped designs and various heights to suit different cable routing needs. Design Features: Safe-T-Curl or Safe-T-Edge top edges protect cables and installers during installation.

Engineered horizontal bends, tees, crosses, and transitions allow precise routing in complex layouts. Continuous ventilation through the mesh structure ensures heat dissipation and prevents cable overheating. Flexible cable entry/exit points enable easy modifications on site.

Load Capacity and Compliance: Mesh cable trays are designed to support heavy cable loads with thick, well-spaced wires. They comply with IEC 61537, NEMA VE-1, and CSA C22. 2 No.

126 standards, ensuring safety and reliability. Models and AccessoriesTOUGHMesh: Offers a complete system including straight sections, bends, covers, inlays, clamps, brackets, and supports, all manufactured to strict specifications for electrical infrastructure safety. Patil More Exports: Provides customizable trays for industrial and export projects, with full test certification and flexible installation options.

Legrand Cablofil: Features high-quality welded steel wire trays with patented Safe-T-Edge design, optimized wire diameters for load capacity, and fast installation with integrated coupling systems.

## Pohl

Con: Offers mesh trays suitable for indoor and outdoor applications, including data centers, industrial plants, and hygienic environments, with a wide range of shapes, heights, and accessories for complete cable management. Accessories: Include supports, clamps, splice plates, connectors, covers, and hangers to facilitate assembly and secure cable routing.

## Applications

Mesh cable trays are widely used in data centers, industrial plants, warehouses, and hygienic environments. Their ventilated design, flexibility, and customizable dimensions make them ideal for low-voltage, data, and power cable management, ensuring safety, airflow, and easy maintenance. By selecting the appropriate material, size, and model, customized mesh cable trays can be tailored to meet the specific requirements of any electrical or data infrastructure project.
