Customized electrical distribution boxes for New Zealand construction projects

Overview

Select from a range of industry standard electrical cabinet sizes, or have your electrical switchboard enclosures custom manufactured from your supplied drawings.

Key Takeaways

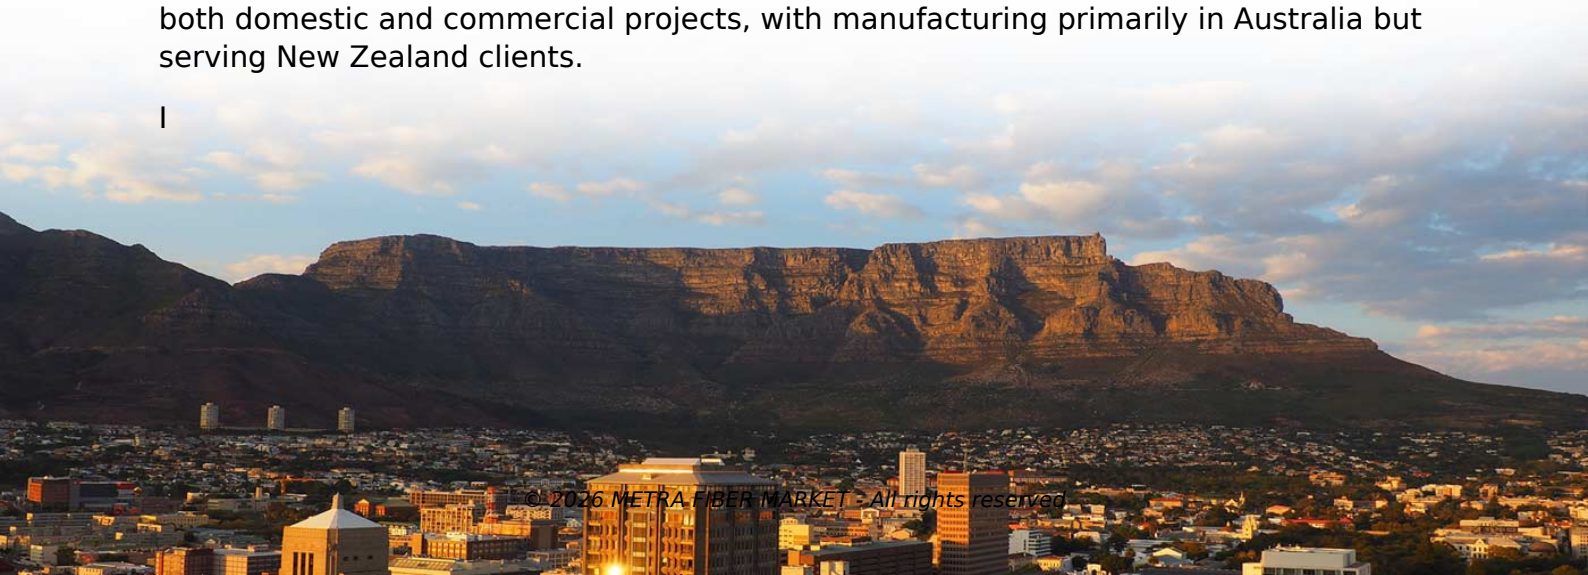

New Zealand offers a range of manufacturers and suppliers for custom-made electrical distribution boxes, providing tailored solutions for construction projects with full design, engineering, and compliance support.

Key Suppliers and Capabilities

Spectrum provides custom electrical switchboard enclosures and cabinets, offering both standard sizes and fully custom builds from supplied drawings. They also offer a full design and build service for complex projects, suitable for various industry sectors across New Zealand. Built Boards specializes in metal switchboard enclosures, outdoor electrical boxes, and custom distribution boards.

They can manufacture bespoke solutions to meet specific power requirements, including stainless steel and powder-coated options. Their products are suitable for both domestic and commercial projects, with manufacturing primarily in Australia but serving New Zealand clients.

P Enclosures focuses on precision-engineered custom electrical enclosures for industries such as mining, infrastructure, automation, renewable energy, and telecommunications. They provide full 2D and 3D design support, compliance with IEC/EN standards (up to IP66), and ready-to-install enclosures, from one-off prototypes to high-volume production. The Electrical Box manufactures weatherproof electrical enclosures and junction boxes tailored to customer specifications, offering custom solutions for both indoor and outdoor applications.

Metcon has over 40 years of experience producing indoor and outdoor electrical cabinets, including custom sizes and stainless steel options, suitable for nationwide construction projects.

Considerations for Custom Distribution Boxes

Compliance and Standards: Ensure enclosures meet local and international standards such as IEC/EN 62208, IEC/EN 61439, and IP ratings up to IP66 for weatherproofing. Material and Finish: Options include powder-coated steel, stainless steel, and weatherproof finishes for durability in outdoor environments. Design Support: Many suppliers offer 2D/3D design review, prototype development, and engineering consultation to ensure the enclosure fits your equipment and site requirements.

Project Scale: Suppliers can accommodate small domestic projects or large commercial and industrial installations, with custom sizing and specialized features as needed. For construction projects in New Zealand, these suppliers provide flexible, high-quality, and compliant custom electrical distribution solutions, ensuring your project requirements are met efficiently and safely.
