# Customized fire-resistant cable trays in Bahrain

## Overview

About Us We are a leading manufacturer of LV Switchgear and control gear, Light Fittings and Fire rated steel doors & Louvers for commercial and EWA substa.

## Key Takeaways

Bahrain offers a variety of fireproof cable trays including steel, aluminum, fiberglass-reinforced plastic (FRP), and concrete trays, each designed for specific fire resistance, load capacity, and environmental conditions. Types of Fireproof Cable Trays1.

### Steel Cable Trays

Material: Hot-dip galvanized or stainless steel for corrosion resistance. Designs: Ladder, perforated, and trough types. Fire Protection: Can be enhanced with intumescent coatings or aluminized polypropylene scrim wraps to achieve fire ratings such as EI 60, 90, or 120.

Applications: Heavy-duty industrial plants, power stations, and commercial buildings where high load-bearing capacity and fire resistance are critical. 2.

### Aluminum Cable Trays

Material: Lightweight aluminum with corrosion-resistant properties. Advantages: Non-magnetic, low thermal conductivity, and easier handling. Applications: Rooftop installations, chemical plants, marine environments, and areas requiring lightweight, fire-resistant solutions.

3.

### Fiberglass-

Reinforced Plastic (FRP) Cable TraysMaterial: Pultruded fiberglass with polyester or epoxy resin. Properties: Non-conductive, corrosion-proof, UV-resistant, and fire-retardant (compliant with ASTM-E84 and BS 476). Applications: Offshore facilities, oil and gas plants, chemical industries, wastewater treatment, and coastal installations where environmental and fire resistance are essential.

4.

### Concrete Cable Trays

Material: Pre-cast concrete in U-shaped or trough designs. Advantages: Maximum protection against fire, impact, and environmental hazards. Applications: Industrial zones, tunnels, outdoor substations, and areas requiring extreme fire and impact protection.

### Fire Protection Methods

### Intumescent Fire-

Resistant Coatings: Paints that expand under heat to form a protective barrier around the tray. Aluminized Polypropylene Scrim Encapsulation: Wrapping trays with fire-resistant material to maintain cable integrity during fire events.

### Fire-

Resistant Tapes and Bandages: Products like FLAMMOTECT-A and DG-CR 0. 7 provide additional protection for cables within trays, delaying flame propagation and maintaining functionality.

### Considerations for Bahrain

Environmental Factors: High temperatures, humidity, and potential exposure to saltwater or chemicals require corrosion-resistant materials like stainless steel, aluminum, or FRP. Load Requirements: Heavy-duty trays for industrial or data center applications, medium-duty for commercial buildings, and light-duty for office or residential use. Compliance: Ensure trays meet local fire safety regulations, NFPA 70, IEC 61537, and other relevant standards.

By selecting the appropriate material, design, and fire protection method, fireproof cable trays in Bahrain can provide reliable cable support, minimize fire hazards, and ensure long-term durability in demanding environments.

About Us

We are a leading manufacturer of LV Switchgear and control gear, Light Fittings and Fire rated steel doors & Louvers for commercial and EWA substations. Our Fire rated doors are type tested (fire

BAHRA ELECTRIC

Originally focused on establishing a strong presence in the industry, we have achieved significant milestones, proudly ranking as the 48th largest wire and

Cable Management System – MTM Trading

At MTM Trading Company W.L.L., we offer Certified Cable Trays, Ladders, Trunking, and Wire Mesh Trays and accessories that ensure clean installations

Cable Trays

Bahra Electric Cable Trays are an essential component of any well-designed electrical infrastructure, providing a safe, organized, and easily accessible

Navitas Electricals WLL | Ebrahim K. Kanoo B.S.C. (c)

The company manufactures, supplies and installs a comprehensive range of cable trays in different dimensions, built to NEMA VE-1, BS and European Standards.

Delta GRP Cable Trays

Delta''s GRP cable trays and ladders are manufactured in Ajman and supplied across Dubai, Oman, Qatar, Bahrain, Kuwait, and Saudi Arabia, offering

Cable Trays & Trunking

The BSLI range of Cable trays and Trunking has been developed from many years of manufacturing expertise for a wide range of customer requirements. They represent a refinement of technical

Cable Management Systems Division

We provide cable management solutions to keep wires and cables organized, protected and secure. Cable management systems can prolong the life of your

ALBaith Lighting, Bahrain

Straight sections are complemented by an extensive selection of fittings, covers and accessories to permit specification of full perforated tray systems from a single source.
