DIY Cable Tray Drilling Frame

Overview

You'll learn how to assemble a sturdy frame, integrate efficient cable routing systems, and add finishing touches like LED lighting. Using tools like miter saws and drills, along with materials such as birch plywood and pine, you can create a piece that fits seamlessly. Cables have a natural desire to tangle when two or more are laid down together, so the cabling under our office desk was spaghetti junction. I even placed a folding table under the desk to put some of the cables on—to keep them off the floor and make cleaning under the desk easier—but they just. To clean up the cable mess under my computer desk, I built my own cable tray. Off-the-shelf cable trays from name-brand makers can be surprisingly pricey. So this build is all about keeping cost down — using only items from the 100-yen / dollar store (Daiso). Proper DIY cord organizer solutions help keep them out of walkways, ensuring safety in your workspace. Organizing your cables can extend their lifespan by reducing wear and tear. Whether. diy external cable routing to internal cable routing, drilling aluminum frame for ICR plastic cable guide from shopee note: TRY AT YOUR OWN RISKIn this video, watch a professional fabricator fitting the base for a cable tray channel step by step — using essential tools like a measuring tape, drill machine, hammer, and level meter.
