

Distance of cable tray support installation position

Overview

The NEC requires that cable trays must be supported by members at an interval specified by the cable tray manufacturer, but not more than 5 feet for horizontal runs to support the weight of the cables and other loads. The NEC has a requirement for ladder-type cable trays. Proper installation can significantly reduce electromagnetic interference, prevent fire hazards, and improve overall efficiency. During forklift offloading on uneven ground, one must exercise extreme caution to prevent load shifting. Clause 522-08-04 Where conductors or cables are not supported. The support spacing recommendations work perfectly with our standard installation practices, and the material lists integrate seamlessly with our procurement system. From a maintenance perspective, the long-term.
