Does H3C have all-optical switches

Overview

H3C provides an extensive array of iOptic Ethernet switches and PON network devices, encompassing all categories of all-optical network devices from core to access. H3C campus switches integrate the multi-ability of AC, SDN, PON and Security. For intelligent ultra-wideband cloud data center, full-scenario data center products and solutions are created for scale, intelligence, and visualization. H3C has been deeply engaged in the campus network for many years. All-optical networks use optical signals to complete all network communication functions, eliminating the need for optical-electrical conversion within the network, thereby bypassing the challenge of improving the information processing rate of electronic devices. The companies said the test results demonstrate that H3C's 800G CPO silicon photonic switch series has “excellent reliability and stability in key performance. With a range spanning ten series and hundreds of switches, H3C's options can cover your networking needs – from the data center core to campus access and remote branches. It summarizes key products such as AD-NET switches, routers, wireless solutions and iMC cloud management platform that help.
