Dutch trough-type cable tray price inquiry

Overview

Cable Trays, Cable Management Trays | RSThese trays are designed to hold and support various types of cables, including power cables, data cables, and comm.

Key Takeaways

The price of Dutch Trough Cable Trays varies widely depending on material, size, load capacity, and supplier, typically ranging from €20 to over €200 per meter.

Factors Affecting Price

Material: Cable trays are commonly made from steel, stainless steel, aluminum, or fiberglass-reinforced polyester. Steel trays are generally the most affordable, while stainless steel and fiberglass options are more expensive due to corrosion resistance and durability. Design and Duty Rating: Dutch Trough Cable Trays come in light, medium, and heavy-duty versions, with thicker materials and higher load capacities costing more.

Features like perforations, covers, and integrated coupling connections also increase the price. Dimensions: Tray width, height, and span length directly influence cost. Longer spans and wider trays require more material and stronger support, raising the price.

Standards Compliance: Trays meeting NEN, IEC, or DIN EN 61537 standards for industrial or marine applications may carry a premium due to certification and quality assurance. Supplier and Market Factors: Prices vary by supplier and region. The Netherlands has a mature cable tray market with multiple suppliers, including Gouda Holland and other local distributors, and pricing can fluctuate with raw material costs, construction demand, and import/export dynamics.

Typical Price RangesLight-duty trays: €20–€50 per meterMedium-duty trays: €50–€120 per meterHeavy-duty or specialized trays (marine, offshore, or high-load): €120–€200+ per meter These ranges are indicative and can vary based on bulk orders, customization, and delivery options. For precise pricing, contacting suppliers directly through platforms like RS Components, Volza, or Gouda Holland is recommended.

Additional Considerations

Installation accessories such as brackets, covers, and fasteners may add 10–30% to the total cost. Lead times can affect pricing, especially for specialized materials like fiberglass or stainless steel. Regional demand in areas like the Randstad or coastal provinces may influence availability and cost due to ongoing infrastructure and renewable energy projects.

By evaluating these factors, buyers can estimate costs and select the most suitable Dutch Trough Cable Tray for their project requirements.
