Key Takeaways

The price of a 635nm laser diode in Ecuador typically ranges from around $5 to $50 USD depending on power output, package type, and supplier. Pricing OverviewLow-power diodes (1–10 mW): These entry-level 635nm laser diodes, often with pigtail or receptacle packages, are generally priced between $5 and $15 USD per unit, suitable for basic optical experiments or consumer electronics applications. Medium-power diodes (15–50 mW): Diodes with features like auto power control or higher stability can cost $20–$50 USD, offering better thermal stability and consistent output for scientific or industrial use.

High-power diodes (50–200 mW or more): These are specialized diodes with thermoelectric cooling, high spectral purity, and linearly polarized output, often used in precision instrumentation or long-range applications. Prices can exceed $50 USD and may require contacting suppliers for quotes.
