Fiber Optic Cable Wall Ladder Price

Overview

Discover our anti-chemical-corrosion FRP fiber optic ladder cable tray, ideal for bulk orders starting at $1.7. Suitable for industrial use, order as few as 1 piece for your project needs.

Key Takeaways

Fiber optic cable wall ladders typically range from $50 to $300 per section, depending on material, size, and supplier. Fiber optic cable ladders, also called ladder trays or ladder racks, are essential for organizing and supporting fiber optic cables in data centers, industrial facilities, and commercial installations. Prices vary based on material (FRP, steel, or polyamide), width, length, and load capacity.

For example, FRP (fiber-reinforced plastic) ladders are corrosion-resistant and often priced competitively for bulk orders. Standard 12-inch wide, 6-foot long wall-mounted sections with brackets and splice hardware typically cost between $50 and $150 per section. For larger or reinforced ladders designed to support heavy cable bundles, prices can reach $200–$300 per section, especially for high-performance thermoplastic or metal constructions.

Suppliers like Alibaba and Made-in-China offer wholesale pricing, which can reduce costs for bulk purchases, while Amazon and specialized distributors provide retail options with immediate shipping. When budgeting, consider additional costs for wall brackets, end splices, 90-degree bends, and horizontal bends, which are often sold separately but are necessary for complete installation. Customizable options are available for specific installation requirements, including circular or ring-style rungs for improved airflow and cable management.
