Fiber Optic Indoor Terminal Box

Overview

Fiber optic termination boxes provide a secure and organized solution for protecting and distributing fiber connections in FTTH, FTTB, and small network deployments. Designed as a compact enclosure, they support both cable splicing and termination while ensuring safe access for. The Fiber Access Terminal Box ORM 1 is designed to terminate an optical network via 2–4 fibers in a customer terminal point. It can be connected to a PC, different peripheral equipment or to another equipment via optical patchcords. It is designed for indoor wall mounting. A fiber optic terminal box — also called an FTB or fiber termination box — is the endpoint where incoming fiber cables are terminated, spliced, and connected to patch cords leading to user. Distribute your fiber efficiently throughout apartment buildings and multi-dwelling units CommScope wall boxes are designed for use in both in-building and outside plant environments.
