# Fiber optic cold connector lc

## Overview

LC Fiber Optic Connectors | Amphenol-Fiber Optic ProductsThe LC provides great space savings in the network. With accelerated growth demanding greater band.

## Key Takeaways

LC cold connectors are field-installable LC fiber optic connectors that require no heat or epoxy, allowing quick, reliable termination in the field.

## Overview

### An L

C (Lucent Connector) fiber optic connector is a small form factor connector with a 1. 25 mm ceramic ferrule, widely used in single-mode and multimode fiber networks for high-density applications such as data centers, telecom, and enterprise networks.

L

C connectors feature a push-pull latch mechanism for secure connections and are available in simplex or duplex formats, with polishing types including UPC (flat) and APC (angled) to minimize back reflection. Cold connectors, also known as mechanical or no-polish connectors, allow fiber termination without the use of heat, epoxy, or curing processes. They rely on an internal mechanical grip to hold the fiber in place, making them ideal for field installations where speed and minimal tooling are required.

### Key Features

Quick Field Termination: Can be installed in under a minute per connector, reducing labor time compared to traditional epoxy or heat-cured connectors. No Special Equipment Needed: Unlike traditional connectors, cold connectors do not require ovens, heat guns, or epoxy curing tools. High Performance: Designed to maintain low insertion loss (typically
