Fireproof sealant for cable tray penetrations through walls

Overview

3M Fire Barrier Moldable Putty+ is a one-part, halogen-free product designed to firestop electrical outlet boxes and a wide variety of through-penetrations including cable, conduit, insulated pipe and metal pipe, which penetrate fire-rated construction. They ensure that openings in walls or floors for feeding through electrical, data, coaxial, and glass fibre cables as well as cable support constructions and electrical installation conduits can be sealed so that the fire resistance of the building element is restored. For example, electricity cables, optical cables, data cables, cable bundles, cable trays and ladders. This organic/inorganic elastomeric sheet is. AF BAGS are intumescent and ablative fireproof pillows certified under EN 1366-3 for sealing up to EI 240 of cable tray penetrations. Effectively fill spaces caused by pipes and cables traveling between walls with 3M's through penetration products. Whether you need preformed plugs or the flexibility.
