French four-port information panel 1200mm deep three-year warranty

Overview

42U Server Rack Cabinet, 1200mm depth, Perf. Front Our 42U server rack cabinet has a perforated front and French rear doors to Lenovo 42U 1200mm Deep Racks.

Key Takeaways

A 1200mm deep server or network enclosure with a three-year warranty can accommodate French four-port panels, offering ample space for cable management, ventilation, and secure mounting.

Overview

For I

T infrastructure requiring a French four-port panel, enclosures with 1200mm depth provide sufficient rear space for cabling and airflow. These racks are typically 42U in height, compatible with standard 19-inch EIA-310 equipment, and designed for high-density deployments. A three-year warranty ensures coverage for manufacturing defects and support for standard operational use.

Key Features

Depth and Dimensions: 1200mm deep (approx. 47 inches), allowing installation of vertical PDUs, cable organizers, and network panels. Widths vary, commonly 800mm or 600mm, depending on the model.

Construction: Durable steel frames with welded or assembled construction for stability and secure mounting of network equipment. Ventilation: Perforated doors (up to 81% perforation) and removable roofs support efficient airflow and cooling for high-density equipment. Cable Management: Integrated rear accessory brackets, top-panel cable routing ports, and full-height cable management rails simplify organization and maintenance.

Installation Options: Many enclosures ship fully assembled for immediate deployment or flat-packed for onsite assembly, offering flexibility in tight spaces. Security and Mobility: Lockable doors and side panels, pre-installed casters, and leveling feet provide secure access and stable placement. Compliance: Compatible with EIA-310 standard equipment and often UL-certified for electrical grounding and safety.

Warranty

Most 1200mm deep enclosures, such as the Lenovo 42U racks, come with a three-year limited warranty, covering defects in materials and workmanship. This warranty ensures reliable operation for standard IT deployments and provides peace of mind for long-term infrastructure planning.

Recommended Use

These enclosures are ideal for: Data centers and server rooms requiring high-density network and server installations. French four-port panels and other network distribution units needing rear space for cabling. High-availability environments where secure, ventilated, and organized mounting is critical.

By selecting a 1200mm deep rack with a three-year warranty, you ensure compatibility with French four-port panels while benefiting from robust construction, efficient airflow, and organized cable management.
