

Gjx dish-shaped optical cable

Overview

GJXH GJFXH FTTH fiber optic cable is a special drop cable. It places the optical fiber in the center, and two parallel steel wires on both sides as reinforcement elements (Or non-metallic FRP reinforcements). In addition, the exterior is surrounded by a low-smoke. Featured are the GJXFH series of bow-type drop optical cables, available for both indoor and outdoor use. All models are non-self-supporting, with non-metal strength members (GFRP or KFRP) and LSZH jackets (including LSZH III for some variants); outdoor models (e. Then the. Shenzhen ZHX Communication's Product Specialists are very happy to help you and provide professional and reliable solutions to help you solve various problems. High performance optical network. The optical fiber unit is positioned in the centre. Two parallelFiber Reinforced member steel wire are placed at the two sides. Then the cable is completed with a black or color LSZH sheath. Special low-bend-sensitivity optical.
