H3C Optical Transceiver

Overview

H3C devices support transceivers. Transceivers are mainly used for optical-to-electrical and electrical-to-optical conversions and provide the following functions: optical power control, modulation transmission, signal probe, IV conversion, and limiting amplifier and. H3C devices support transceivers. In. Optical transceivers are widely applied in switches, routers, network cards and other communication equipment. We connect Moduletek QSFP-40G-LR4 transceiver to H3C S6820 switch, and. A transceiver module converts electrical data signals to laser light, which is then transmitted over an optical fiber. It can transmit optical signals over long distance with low signal loss.
