High-configuration distribution boxes

Overview

The distribution box offers unprecedented flexibility in configuration options, allowing for precise adaptation to specific application requirements. The modular design enables customers to select from a wide range of components and layouts, ensuring optimal functionality for. The range of applications extends from pure energy distribution in buildings to building automation and through to industrial plants. SMART DISTRIBUTION BOXES FOR FLEXIBLE BUILDINGS. Wieland is your experienced and reliable partner for efficient, pluggable and decentralized electrical installation. Our experts will be happy to advise you on the individual configuration of your distribution box for surface mounting. Specification Termination shell With LED green/yellow Total number of ports 4 Number of contacts 4' Rated voltage 10 V DC 30 V DC Limiting temperature -30. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required.
