House Electrical Cable Trays

Overview

Cable tray systems are the perfect solution for running large quantities of power or data cables overhead or under-floor. Also known as baskets, trunking, or cable ladders, these systems are designed to both route and provide support for vital wiring. As with anything electrical, the National Electrical Code (NEC) has rules tied to its use. 2 defines a cable tray system as “a unit or assembly of units or sections with associated fittings forming a rigid structural system used to securely fasten or support cables and raceways. ”. The Ladder Cable Tray: For Power and Heat A ladder cable tray looks like a ladder. It has two side rails and connecting rungs. Unlike conduit systems, cable trays allow cables to be laid in bundles, improving accessibility, heat. B-Line 24A12-06-120 24 Series Straight Section Cable Tray, 3. 05 in D.
