How much do cable trays and hangers cost

Overview

Discover the 2026 cost breakdown for cable trays compared to conduit and wire mesh. Compare material prices, labor savings, and performance to find your best value.

Key Takeaways

Custom cable trays and hangers typically cost between $5 and $100 per meter depending on material, type, finish, and installation complexity.

Material Costs

The cost of cable trays varies significantly based on the material used: Steel trays: $5–$25 per meter, widely used for general-purpose installations due to durability and affordability. Aluminum trays: $6–$30 per meter, lightweight and corrosion-resistant, ideal for outdoor or industrial environments. Stainless steel trays: $20–$100 per meter, highly durable and corrosion-resistant, suitable for harsh or hygienic environments.

FR

P (Fiberglass Reinforced Plastic) trays: $10–$50 per meter, used in aggressive chemical or wet environments. The type of tray also affects cost: ladder trays are more expensive but support heavy cables, perforated trays are mid-range, and wire mesh trays are cheaper and easier to install.

Customization Factors

Customizing cable trays and hangers can increase costs due to: Tray dimensions: Wider or deeper trays use more material. Special finishes: Hot-dip galvanizing (HDG) or powder coating adds corrosion resistance but increases price. Accessories: Bends, reducers, connectors, covers, and specialized hangers add to the total cost.

Load requirements: Heavy-duty trays designed to carry more weight or support concentrated loads require stronger materials and more robust hangers. Environmental conditions: Outdoor, coastal, or chemical environments may require corrosion-resistant materials, increasing cost.

Labor and Installation Costs

Labor is a significant portion of the total cost. Skilled workers, equipment depreciation, and energy consumption for cutting, welding, and finishing all contribute. Installation complexity, such as supporting trays at specific heights or in tight spaces, can further increase costs.

Custom hangers may require additional fabrication and precise placement, adding to labor expenses.

Cost-

Saving Tips

Bulk orders: Ordering larger quantities can reduce per-meter costs. Standardized components: Using standard bends, tees, and hangers reduces custom fabrication costs. Material selection: Choosing pre-galvanized steel for indoor use can save money compared to HDG or stainless steel.

Summary

For a typical project, custom cable trays and hangers can range from $5 to $100 per meter, depending on material, tray type, finish, accessories, and installation complexity. Accurate pricing requires providing suppliers with detailed specifications, including tray dimensions, load requirements, environmental conditions, and any special customization needs.
