How much does a Czech cable mesh tray cost

Overview

Cable tray pricing depends on materials, coatings, size, supplier margins, and order quantity —plus hidden costs like shipping and installation.

Key Takeaways

Czech mesh cable trays typically cost between $10 and $25 per meter, depending on material, size, and finish.

Price Overview

Mesh cable trays, also known as wire mesh trays, are generally more affordable than ladder or solid trays due to their lightweight design and suitability for lighter wiring systems (FEMI-CZ). The average price per meter ranges from $10 to $25, with steel being the most common material, balancing durability and cost, while aluminum trays are slightly more expensive. Plastic trays are cheaper but not suitable for heavy loads.

Factors Affecting Cost

Material: Galvanized steel is standard; stainless steel and aluminum increase the price. Surface Finish: Hot-dip galvanizing, powder coating, or pre-galvanized finishes affect durability and cost. Size and Load Capacity: Larger trays or those designed for high-load applications cost more.

Supplier and Bulk Orders: Purchasing in bulk or negotiating with local Czech suppliers like ARKYS can reduce per-meter costs.

Installation and Maintenance

Mesh trays are easy to install, ventilate cables effectively, and require minimal maintenance, which can reduce overall project costs. They are also made from recyclable materials, supporting sustainability.

Practical Tip

For large projects, contacting Czech suppliers directly, such as ARKYS, can provide custom pricing, bulk discounts, and material options tailored to your installation needs. In summary, expect to pay around $10–$25 per meter for standard mesh cable trays in the Czech Republic, with final pricing influenced by material, finish, and order volume.
