How much does a cardiac stent cost

Overview

How Much Does a Stent Procedure Actually Cost?

Unravel the true cost of a cardiac stent. We analyze facility fees, insurance coverage, patient responsibilit.

Key Takeaways

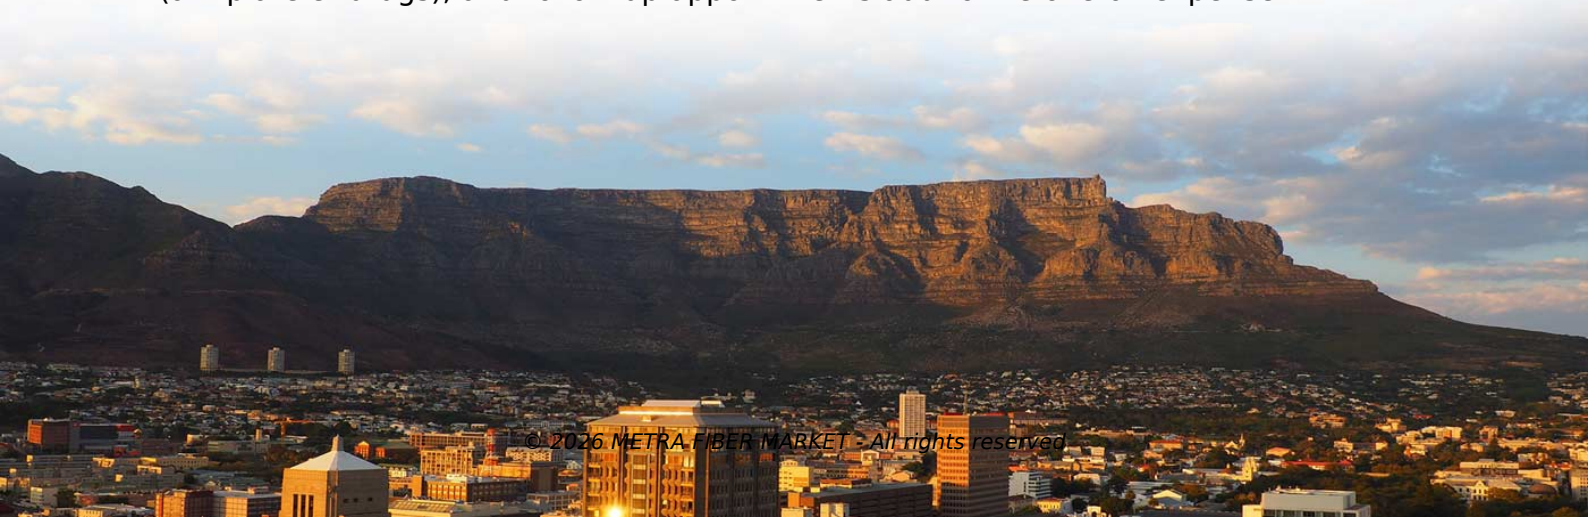

The total cost of a cardiac stent procedure typically ranges from $10,000 to over $50,000, depending on stent type, hospital, and location.

Breakdown of Costs

Stent Device: A basic bare-metal stent (BMS) costs around $300, while a drug-eluting stent (DES) can cost up to $5,000. Hospital and Facility Fees: These cover catheterization lab use, operating room time, specialized equipment, recovery room care, nursing support, and overhead expenses. Professional Fees: Charges from the interventional cardiologist, anesthesiologist, and assisting staff are included in the total cost.

Pre- and Post-

Procedure Costs: Diagnostic tests (angiograms, stress tests, blood work), medications (antiplatelet drugs), and follow-up appointments add to the overall expense.

Factors Affecting Cost

Type of Stent: Drug-eluting stents are more expensive than bare-metal stents. Hospital and Location: Academic medical centers or specialized cardiac hospitals often charge more than community hospitals, and metropolitan areas tend to have higher costs. Insurance Coverage: Private health insurance may cover part or all of the procedure, but coverage varies by provider and plan.

Number of Arteries Treated: Treating multiple arteries increases the procedure cost.

UK Context

In the UK, private coronary angioplasty (including stent placement) typically costs between £5,000 and £15,000, depending on the hospital, consultant, and aftercare included. Consultation fees are usually separate, ranging from £250 to £350.

Summary

While the stent itself is a small fraction of the total cost, the overall procedure—including hospital, professional, and follow-up care—can be substantial. Costs vary widely based on stent type, hospital, location, and insurance coverage, so obtaining a personalized quote from your cardiologist or hospital is recommended.
