How much does a fiber optic KVM solution cost

Overview

The Fiber Extender is designed to extend signals over Optical Fiber for long-distance transmission. Rextron is good at providing a variety of KVM solutions, including Fiber KVM extenders.

Key Takeaways

Fiber optic KVM systems typically range from $500 to over $5,000 depending on distance, resolution, and features.

Price Ranges and Factors

The cost of a fiber optic KVM system depends on several key factors: Transmission Distance: Short-range systems (up to 300–500 meters) are generally less expensive, while long-range extenders (up to 10 km or more) can significantly increase the price. Video Resolution: Systems supporting 4K resolution or dual/triple monitors cost more than standard 1080p setups. Fiber Type: Single-mode fiber extenders are typically more expensive than multi-mode fiber due to longer distance capabilities.

Additional Features: USB ports, IR/RS-232 control, and matrix switching capabilities add to the cost. Installation and Labor: For larger deployments, costs include fiber cabling, connectors, and professional installation, which can range from a few hundred to several thousand dollars depending on complexity. Typical Cost ExamplesEntry-Level Systems: Basic 1080p fiber KVM extenders for short distances (up to 300 meters) can start around $500–$1,000 per transmitter/receiver pair.

Mid-

Range Systems: 4K HDMI or DisplayPort extenders with USB support for distances up to 500 meters may cost $1,500–$3,000.

High-

End Systems: Long-distance extenders (up to 10 km or more) with multi-monitor support, matrix switching, and advanced control features can exceed $5,000 per set.

Cost-

Saving Tips

Use multi-mode fiber for shorter runs to reduce cable and module costs. Bundle multiple extenders in a single purchase to leverage volume discounts. Plan installation efficiently to minimize labor and trenching costs for outdoor deployments.

In summary, a fiber optic KVM system can cost anywhere from $500 for basic setups to over $5,000 for advanced, long-distance, multi-monitor systems, with the final price influenced by distance, resolution, fiber type, and additional features.
