How much does a meter of metal cable trays cost in South Korea

Overview

Discover the key factors affecting cable tray price per meter, including materials, demand, and competition. Get cost insights and future pricing trends.

Key Takeaways

Metal cable trays in South Korea typically cost between $10 and $50 per meter, depending on material, type, and coating. Price Range by Material and TypeGalvanized Steel: $10–$30 per meter. This is the most common choice, balancing durability and cost, suitable for indoor and moderately corrosive environments (pre-galvanized is cheaper, hot-dip galvanized is more durable).

Aluminum: $20–$50 per meter. Lightweight and corrosion-resistant, ideal for installations where weight is a concern. Stainless Steel: Higher-end pricing, often above $50 per meter, used in highly corrosive or hygienic environments such as food processing or coastal areas.

Wire Mesh or Perforated Trays: Generally cheaper than ladder trays, suitable for lightweight cabling and data centers.

Factors Affecting Cost

Coating and Finish: Hot-dip galvanizing (HDG) and powder coating increase durability but raise the price. Tray Type: Ladder trays are more expensive than perforated or wire mesh trays due to higher load capacity. Bulk Orders: Purchasing in large quantities can reduce the per-meter cost.

Local Labor and Shipping: Installation costs and shipping from suppliers can influence the final price in South Korea.

Supplier Options

South Korea has access to both local manufacturers and international suppliers through platforms like Global Sources, offering factory prices for bulk orders. Comparing multiple suppliers and negotiating long-term contracts can help reduce costs. In summary, for standard industrial or commercial projects in South Korea, expect to pay roughly $10–$30 per meter for steel trays and $20–$50 per meter for aluminum trays, with stainless steel and custom-coated trays costing more depending on specifications and environmental requirements.
