Huawei fiber optic cable network cable combo panel

Overview

Telhua's HUAWEI FTTH 8-core fiber optic terminal box delivers high-density, reliable termination with IP65 protection. Features tool-less installation and meets IEC/TIA/EIA/RoHS standards for B2B network deployments. Huawei OptiXstar S600E is a miniature GPON SFP ONU device that can be inserted into the SFP port of a camera or AP device to provide GPON access for the device to meet the requirements of video backhaul or wireless backhaul. It uses the QuickConnect technology to implement plug-and-play of optical cables without splicing. The uneven optical splitting technology greatly reduces the usage of optical cables, standardizes. The Huawei Fiber Optic Terminal Box is a highly reliable and versatile solution for fiber optic network termination, especially in FTTH (Fiber to the Home) and enterprise network deployments.
