Iceland Offshore Price Optical Module 1G

Overview

1G SFP optical transceiver modules for multi-mode and single-mode in distances ranging from 300 meters up to 80km with a limited lifetime warranty.

Key Takeaways

1G SFP optical modules typically range from $5 to $120 per unit, depending on brand, compatibility, and distance specifications.

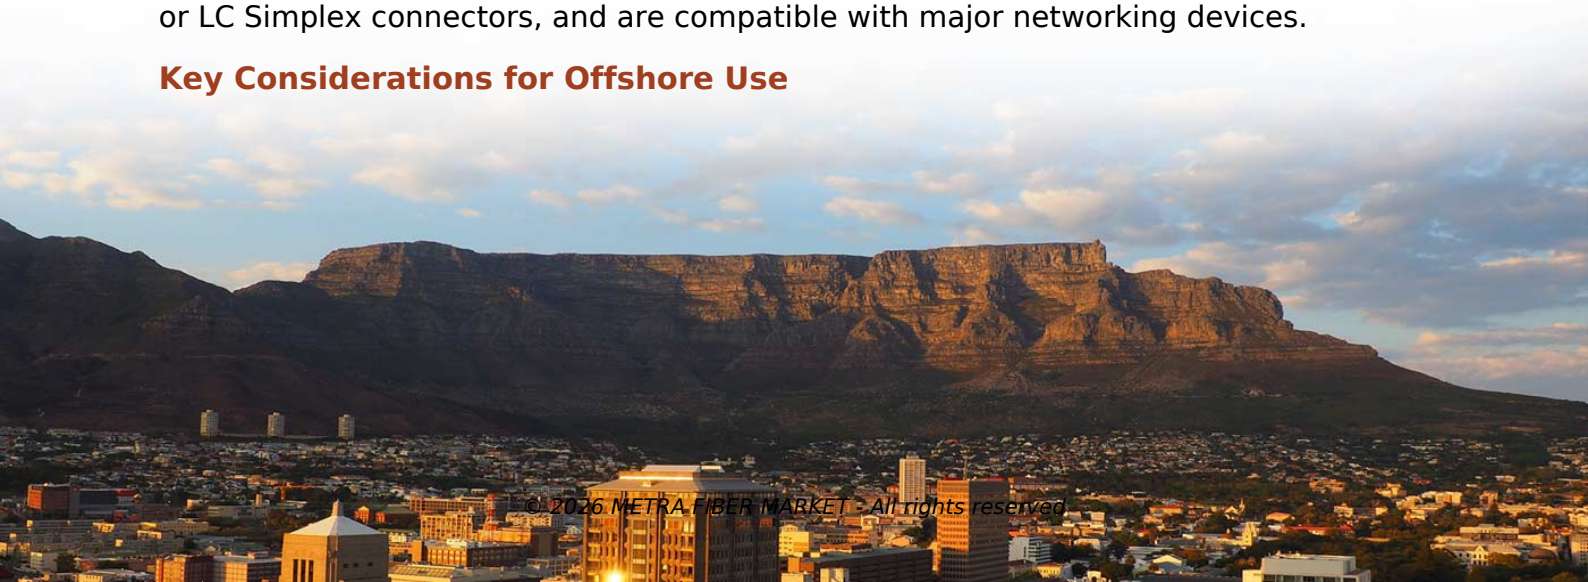

Price Overview

The cost of 1G SFP optical modules varies widely based on whether the module is OEM-branded (Cisco, HPE, Juniper) or a compatible third-party unit. For standard 1000BASE-SX/LX SFPs: Low-end compatible modules: $5–$25 per unit, suitable for short-reach enterprise links or legacy aggregation ports.

High-end OE

M or industrial modules: $60–$120+, often required for long-distance, extended temperature, or specialized applications. These modules support singlemode or multimode fiber, with distances ranging from 100 meters up to 80 km depending on the model. Long-distance singlemode modules can reach 10–180 km, with LC Duplex or LC Simplex connectors, and are compatible with major networking devices.

Key Considerations for Offshore Use

© 2026 METRA FIBER MARKET - All rights reserved

Distance and Fiber Type: Offshore installations may require singlemode modules for long-distance connectivity, typically priced higher than short-reach multimode modules. Environmental Conditions: Modules designed for industrial or extended temperature ranges are recommended for offshore environments, which can increase cost. Vendor Compatibility: Ensure modules are compatible with existing switches, routers, or network interface cards.

Many third-party modules are Cisco-compatible and provide reliable performance at lower cost. Warranty and Reliability: OEM modules often include full warranty and guaranteed performance, while third-party modules may offer limited warranty but are cost-effective for large deployments.

Procurement Guidance

For Iceland offshore projects, consider sourcing from European distributors or global suppliers that ship to Iceland. Compatible 1G SFP modules are widely available online and can be plug-and-play, reducing installation complexity. For critical long-distance links, investing in OEM modules may be justified to ensure network stability and compliance with industrial standards.

In summary, for offshore networking in Iceland, expect to pay $5–$25 for standard compatible 1G SFPs and $60–$120+ for OEM or long-distance modules, with the final choice depending on distance, environmental conditions, and vendor compatibility.
