Indicator lights on mobile fiber optic routers

Overview

Modem & Router Lights Explained | BroadbandSearchLearn what they mean and how to keep your Wi-Fi running smoothly. Your modem and router are communicating.

Key Takeaways

Fiber router lights indicate power, signal status, LAN/Wi-Fi activity, and potential connection issues, with colors and blinking patterns providing diagnostic information.

Common LE

D Indicators1.

POWER Light

Solid Green: Router is powered on and functioning normally. Off: No power; check the power cable, adapter, or outlet. Blinking: Router is booting or restarting.

2.

PO

N (Passive Optical Network) LightSolid: Normal optical signal from the fiber network. Blinking: Abnormal signal levels; may indicate weak or unstable fiber signal. Preferred optical signal: -20 dBm to -27 dBm.

3.

LO

S (Loss of Signal) LightOff: Normal, no signal loss. Red or Blinking: Fiber disconnection, damaged cable, dirty connector, or no signal from the ISP. 4.

LA

N (Ethernet) LightFlickering: Active data transmission to a connected device. Off: No device connected or faulty Ethernet cable/port. 5.

WLA

N / Wi-Fi LightFlickering: Wireless activity is occurring. Off: Wi-Fi disabled in router settings. 6.

WPS Light

Blinking: Router is in pairing mode, ready to connect new devices. If not intentionally pairing, consider disabling WPS for security.

Interpreting Light Patterns

Slow, steady blinking: Router is attempting to establish a connection. If it persists for more than 15–20 minutes, there may be a connection problem. Rapid blinking: Normal data transmission over Wi-Fi or Ethernet.

Red or amber lights: Indicate errors, such as no internet connection, hardware issues, or ISP problems.

Troubleshooting Tips

Check power: Ensure the router and ONT are plugged in and powered. Inspect fiber and Ethernet cables: Look for damage or loose connections. Restart devices: Power cycle the ONT and router to reset connections.

Check IS

P status: If all lights appear normal but internet is down, the issue may be with the provider or account service. Understanding these indicators helps quickly identify whether the issue is with the router, fiber connection, or ISP, allowing for efficient troubleshooting and maintenance.
