Indoor Fiber Optic Cable Shielding Box

Overview

With 2 lockable latches, 2 cable clamps, 2 mounting holes and 2 cable ties, it creates a watertight sealing space, keeps outdoor & indoor Fiber optic cable connection dry and safety, easy to place and hang anywhere. Fiber Connection Protection Box is a device designed for fiber optic line terminal connection and protection and is widely used in fiber optic communication systems such as fiber to the home (FTTH), local area network (LAN), and metropolitan area network (MAN). It provides a flexible fiber management system for transitioning outside plant cable toindoor cable via splicing or with connectorized cable assemblies. These ratings follow international standards such as EN 60529 and ISO 30161. An IP65-rated fiber optic box type uses a sealed enclosure that blocks dust and resists water jets from any. Our indoor enclosures include a variety of powder coated steel enclosures that are available in different dimensions and capacities. All of our indoor enclosures are constructed to provide protection for your fiber optic terminations.
