

Installation Location of Integrated Relay Protector

Overview

Relay is best mounted vertical in accordance with the “INSERT RELAY THIS WAY UP” label. All persons responsible for applying the equipment addressed in this manual must satisfy themselves that each intended application is suitable and acceptable, including that any applicable safety or other operational requirements are complied with. It is a potential risk of DAMAGE TO EQUIPMENT. Rights areas which may have an impact and is protected under Copyright law. This Engineering Note details the ideal installation requirements for the IPC and IPD Integrated Protection Relays. IPC and IPD Integrated Protection Relays are installed in electrical distribution enclosures including substations and DCBs to provide comprehensive protection of electrical outlets.
