Interconnecting two access switches

Overview

This article will explore three common connection methods: switch cascading, switch stacking, and switch clustering, and will help you determine the best approach based on network size, performance requirements, and management needs. Switch cascading is a traditional method for connecting multiple. Connecting switches can be achieved through two common methods: cascading and stacking. In this guide, we will explore these two approaches and provide you with the necessary details to make an informed decision. Use access port on both sides 2. Sw1 (Gi1/48) Sw2 (Gi1/48) (new) (Merki switch. Q1) Can we connect two switches, having only single VLAN25 on both the switches, while all ports on both switches are access ports?

Description regarding Q 1) I have two cisco 2950 Switches.
