Lclc duplex fiber coupler

Overview

LC to LC Fiber Optic Wall PlateThis LC connector wall plate can connect four LC fiber cables and extend the fiber connection in the network setup for secure connection.

Key Takeaways

An LC-LC duplex fiber coupler is a device that connects two LC-terminated fiber optic cables, supporting both singlemode and multimode applications.

Overview

An LC-LC duplex fiber coupler is a small form-factor adapter that allows two fiber optic cables with LC connectors to be joined together. It is commonly used in networking, data centers, and telecommunications to extend fiber runs or connect patch panels without splicing. Duplex couplers support two fibers simultaneously, enabling bidirectional communication over a single cable assembly.

Key Features

Connector Type: LC (Lucent Connector) duplex, using a 1. 25 mm ceramic ferrule for precise alignment. Compatibility: Works with singlemode (9/125 µm) and multimode (50/125 µm or 62.

5/125 µm) fiber cables. Adapter Type: Female-to-female, allowing two patch cables to be connected securely. Alignment Sleeve: Uses ceramic or bronze sleeves to ensure low insertion loss and high precision mating.

Mounting Options: Can be panel-mounted in rectangular cutouts or used as standalone inline adapters.

Applications

Extending fiber optic runs in data centers or telecom networks. Connecting duplex fiber patch cables between switches, routers, or optical transceivers. Facilitating fiber testing or temporary connections without permanent splicing.

Advantages

Ease of use: Simple plug-and-play connection for LC fiber cables. Versatility: Supports both singlemode and multimode fibers. Durability: Ceramic ferrules and alignment sleeves provide stable, low-loss connections.

Cost-effective: Available in packs for large deployments, reducing installation time and cost.

Considerations

Ensure the coupler matches the fiber type (singlemode or multimode) to avoid signal loss. Check the insertion loss and return loss specifications for high-performance applications. For panel installations, verify the cutout size and mounting compatibility.

LC-LC duplex fiber couplers are essential components for reliable fiber optic connectivity, providing a compact, precise, and reusable solution for linking fiber cables in both enterprise and industrial environments.
