Low-loss DC power distribution units for Philippine server racks are in stock

Overview

Power Distribution Units | Rack & Switched PDUs | RSShop rack-mounted, vertical, and switched PDUs with surge protection. RS Philippines offers power distr.

Key Takeaways

Low-loss DC power distribution units (PDUs) for server racks are available in the Philippines, offering energy-efficient, rack-mounted, and metered options for reliable data center power management. Available OptionsRS Philippines offers a wide range of PDUs suitable for server racks, including rack-mounted and vertical units with multiple outlets, surge protection, and circuit breakers for safe operation. Advanced switched PDUs allow remote monitoring and individual outlet control, enhancing efficiency and reducing downtime.

Schneider Electric Philippines provides Easy Metered and Switched Rack PDUs, featuring real-time remote monitoring, outlet-level power management, and energy metering. These units are customizable with unique input plugs, outlet configurations, and colors to match specific rack requirements. Eaton offers rackmount PDUs with high-density, metered, and managed options.

Their ePDU G4 technology supports remote on/off switching, group reboot, and universal input, making it suitable for small network closets to enterprise data centers.

CHIN

T Philippines supplies the EnergiX-P40 low-voltage PDU, designed for data centers with modular layouts, live-swappable circuits, and intelligent monitoring for remote management. It supports high current ratings (up to 400A) and provides enhanced energy efficiency and protection against overvoltage and overcurrent. International Config stocks multiple outlet PDUs and power strips compliant with Philippine standards, suitable for surface mount, rack mount, and general-purpose applications in server rooms and data centers.

Key Features to Consider

Energy Efficiency: Low-loss DC PDUs reduce power wastage and improve overall data center efficiency. Rack Compatibility: Horizontal or vertical mounting options for standard 19-inch server racks. Monitoring & Control: Metered and switched PDUs allow real-time monitoring, remote outlet control, and load balancing.

Safety: Built-in surge protection, circuit breakers, and compliance with IEC standards ensure reliable operation. Scalability: Modular designs and high-density outlets support future expansion and multiple-circuit operation.

These PD

Us are in stock and ready for deployment in Philippine server racks, providing reliable, energy-efficient power distribution for IT infrastructure.
