Luxembourg Vehicle-Mounted Fiber Optic 2-Core Hybrid Cable Price

Overview

Discover the cost of fiber optic cable in this pricing guide. Learn material prices, installation factors, and what impacts total project costs overall.

Key Takeaways

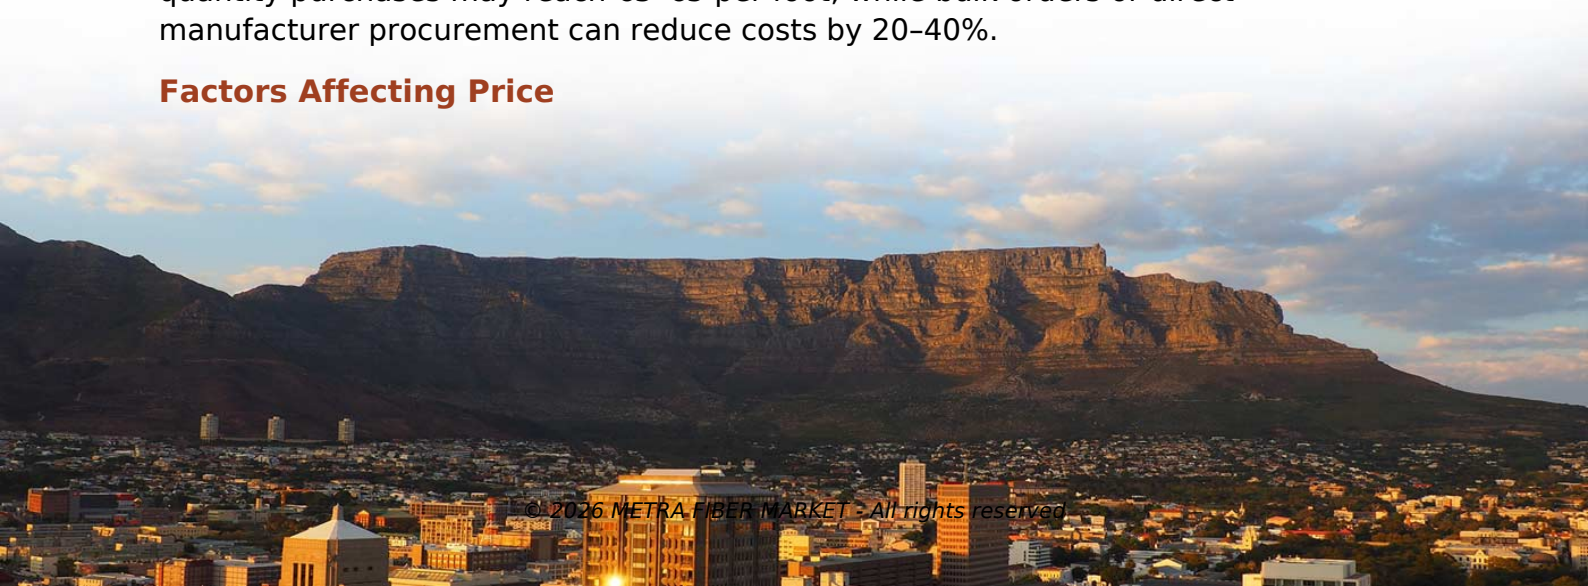

A 2-core hybrid fiber optic cable for vehicle-mounted applications in Luxembourg typically costs between €1. 50 and €5 per foot, depending on specifications and supplier.

Pricing Overview

Hybrid fiber optic cables combine optical fibers and power conductors in a single cable, allowing both data and power delivery to remote devices, such as 5G small cells or IoT equipment. For a 2-core fiber configuration, the material cost generally ranges from €0. 50 to €1.

50 per foot for the fiber itself, with additional cost for copper power cores and armored or ruggedized construction suitable for vehicle mounting. Retail or small-quantity purchases may reach €3–€5 per foot, while bulk orders or direct manufacturer procurement can reduce costs by 20–40%.

Factors Affecting Price

Cable Construction: Armored or corrugated hybrid cables designed for outdoor or vehicle-mounted use are more expensive than standard indoor cables. Fiber Type: Single-mode fibers (OS1/OS2) are slightly cheaper per foot than multimode fibers (OM3/OM4), but multimode may be preferred for short-range high-speed applications. Environmental Rating: Cables rated for harsh conditions, UV exposure, or direct burial increase cost.

Vehicle-mounted cables often require flexible, abrasion-resistant jackets. Supplier and Location: European distributors or local Luxembourg suppliers may charge higher prices than bulk international manufacturers, but they provide faster delivery and compliance with EU standards. Customization: Custom hybrid designs with specific power cores, fiber counts, or connectors can increase the price significantly.

Procurement Tips

Contact local suppliers or distributors in Luxembourg for quotes, such as those listed on EnSun or Mouser Europe. Specify vehicle-mounted requirements, including flexibility, temperature range, and mechanical protection. Consider bulk purchasing to reduce per-foot cost if multiple units are needed.

Verify compliance with UL, IEC, and EN standards for safety and performance. In summary, for a 2-core hybrid fiber optic cable suitable for vehicle-mounted applications in Luxembourg, expect a price range of approximately €1. 50–€5 per foot, with final cost depending on construction, fiber type, environmental rating, and supplier choice.
