# Mali Aggregation Switch 100G

## Overview

Each QSFP28 port can be split into 4x 10G ports or 4x 25G ports, providing converged 10G, 25G, 40G, and 100G fiber links. This 24-port switch delivers an 880 Gbps switching capacity and 540 Mpps forwarding rate to meet high-performance aggregation layer requirements. FS 100G Switches offer high programmability and scalability, designed for large enterprises and hyper-converged infrastructure (HCI) networks. 8 Tbps high-density 100G/25G Layer 3 Etherlighting™ aggregation switch with MC-LAG support for high availability system design. Layer 3 automatic failover (VRRP) and OSPF support is. FS 100 Gigabit data center switches with build-in broadcom switch chip provides powerful hardware switching capacity and data center features (supporting stacking, MLAG, RoCEv2, PFC, ECN, VxLAN, EVPN, REUP, etc), making them ideal for cloud data center and high-end campus network. The 3232C, part of the Cisco Unified Fabric family, is a compact, 1-rack-unit (1RU), form factor switch for top-of-rack (ToR) data center deployments. Ease of Operations The modular, resilient Cisco NX-OS. 1. Help others learn more about this product by uploading a video!
