# Manufacturer s cold aisle wall-mounted racks

## Overview

By maintaining consistent, predictable temperatures, cold aisle containment minimizes thermal stress and reduces the risk of overheating, improving reliability and extending equipment lifespans.

## Key Takeaways

Leading manufacturers of cold aisle containment and wall-mounted racks include Legrand, Gordon Inc, Tate, Polargy, and AMCO Enclosures, offering modular, scalable, and energy-efficient solutions.

### Key Manufacturers and Offerings

Legrand provides cold aisle containment systems that create enclosed corridors in front of server cabinets, ensuring cold air is directed efficiently into equipment intakes. Their Contain-IT FLEX system is modular, pre-fabricated, and can be assembled on-site to support both hot and cold aisle containment, with options for cabinet- or ceiling-supported configurations. Legrand also offers seismic-rated solutions and custom engineering services for specialized data center requirements.

Gordon Inc specializes in aisle containment systems that manage both hot and cold air, offering 3D CAD designs tailored to customer needs. Their solutions can achieve 20-40% savings in cooling costs and improve airflow management while enhancing the appearance of server areas. Tate delivers modular containment solutions, including cold aisle systems with hard roofs, doors, and custom partitions.

Their systems are designed to improve cooling efficiency, reduce energy loss, and allow flexible reconfiguration as data center demands evolve. Polargy manufactures integrated containment partitions and structural hot/cold aisle containment systems. Their solutions include vertical panels, aisle end doors, and ceiling-integrated supports for cable trays and power busways.

Polargy emphasizes fast installation, reduced on-site labor, and optimized airflow management for consistent environmental conditions.

### AMC

O Enclosures designs and manufactures high-quality server racks and electronic cabinets suitable for data center containment applications. Their products focus on strength, performance, and reliability, and can be integrated into cold aisle containment setups.

### Considerations for Selection

When choosing a cold aisle wall-mounted rack or containment system, consider: Modularity and scalability: Ability to adapt to changing data center layouts. Energy efficiency: Systems that reduce cooling costs and optimize airflow. Installation flexibility: Ceiling- or cabinet-supported options, pre-fabricated components.

Custom engineering support: For unique layouts, seismic requirements, or pre-loaded shipping. Integration with existing infrastructure: Compatibility with cable trays, power busways, and lighting. These manufacturers provide a range of solutions suitable for enterprise, colocation, and hyperscale data centers, ensuring improved cooling performance, equipment reliability, and operational efficiency.

## Article Content

Cold Aisle Containment | Legrand

By maintaining consistent, predictable temperatures, cold aisle containment minimizes thermal stress and reduces the risk of overheating, improving reliability and extending equipment lifespans.

Aisle Containment | Vertiv Hot/Cold Aisle Containment

Adaptable to hot and cold aisle containment, the Vertiv Aisle Containment system allows you to deploy containment before or after racks are installed to simplify

APC NetShelter Aisle Containment | Schneider Electric

Configurable with vertical duct for hot aisle architecture or horizontal flat roof for cold aisle. Multi-purpose ceiling and wall tiles accommodate non-uniform rack heights

Aisle Containment

Upgrade your data center with our conversion kit for efficient hot/cold aisle containment. It transforms single-row end-of-row frame into a wider, U-shaped

Hot & Cold Aisle Containment Systems For Data

Cool Shield™ products provide customers with versatile, turnkey aisle containment systems for new or existing critical spaces. Our offerings range from a single row

Aisle Containment for IT Infrastructure

Rittal''s new aisle containment line solves these problems with a modular, standards-based design that integrates easily with existing racks, cabling, HVAC, and safety systems. Our Containment line

Products

Hot & Cold Aisle Containment AMCO''s Hot and Cold Aisle Containment Systems prevent hot and cold air mixing by creating controlled airflow paths, improving

Aisle Containment Systems for Hot & Cold Aisle Solutions

Cool Shield Aisle containment solutions reduces server row temperatures in active data centers. Learn more about the benefits of hot and cold containment.

CONTAINMENT SYSTEM

Accommodates aisle widths from 36” wide to 96” wide. Can be mounted cabinet-to-cabinet or cabinet-to-wall Customization of sizes/shapes available to fit any site requirements and conditions including

Aisle containment | Airflow management | Eaton

Aisle containment ceilings, walls and end of row doors are designed to help maintain optimal operating temperature in server rooms and data centers in order to lower data center energy demands and

Containment

Floor Mounted Hot Aisle Containment System Tate''s Floor Mounted Hot Aisle Containment (HAC) system is a pre-engineered solution that expertly channels hot air from IT equipment into an

Hot & Cold Aisle Containment Systems For Data Centers by Cool Shield

Cool Shield™ containment offers state-of-the-art hot and cold aisle containment solutions designed to maximize data center efficiency while significantly reducing power consumption.

Aisle Containment Solutions | Maysteel Industries

*© 2026 METRA FIBER MARKET - All rights reserved*

Custom engineered hot and cold aisle containment solutions that keep your data center running smoothly and make your build-out be more efficient, too.

Aisle Containment

Our aisle containment systems are vendor agnostic, featuring innovative, transparent panels that are lightweight and easily attached horizontally or vertically to cabinets using a universal rail system.

Hot and Cold Aisle Containment Solution | Legrand

Hot aisle containment is used to capture and direct hot exhaust air back to the cooling units. This popular option is ideal for data centers looking to maximize

COLD AISLE CONTAINMENT -

One of the most widely used solutions is cold aisle containment, a product of Cold Aisle Containment Manufacturers like Modular Rack Systems (MRS). This

Server rack manufacturers in China | Suntec

Suntec offers a variety of products like Server Racks, Server Cabinets,Network Racks, Network Cabinets, Rack PDU, Wall mounted Cabinets and much more products.

Aisle Containment – Racktech – World class intelligent solutions

Aisle Containment Hot and Cold Aisle Containment Solutions Racktech is the Australian Distributor of market leading Polargy Hot and Cold Aisle Containment solutions. Since 2007 Polargy has been the
