

Micro-modular management solution

Overview

Micro Modular's Control Systems Integration combines IoT-enabled housing, intelligent metering, environmental monitoring, remote management, predictive maintenance, and access control—supporting scalable, data-driven housing portfolios for public and private operators. PALMA is the leading SaaS solution for creating, managing and implementing modular and configurable products from start to finish. “What we were trying to achieve. MicroModular is focused on developing scalable, container-based solutions across residential homes, ADUs, multifamily housing, and infrastructure projects. The work centers on efficient construction, sustainable systems, and designs built to adapt as needs grow. Empower your team with our Advisory Services, Managed Services and Academy Services. Leverage our proven frameworks, receive specialized training and obtain expert. Delta InfraSuite is a new generation, highly integrated modular datacenter solution. These systems feature an installation kernel and passphrase package, enabling adaptable architecture for industrial IoT (IIoT), edge computing, and embedded. Preferred choice for small- and medium-sized DCs, integrating power supply and distribution, cooling, rack, contained aisle, and monitoring systems to realize one DC per module.
