Models and Specifications of Flame-Retardant Optical Cables for Telecommunications

Overview

These multi micromodule cables are designed for indoor/outdoor installation in tunnel infrastructure, and public building such as hospitals, railway stations, airports,...and more.

Key Takeaways

Flame-retardant optical cables are designed with specialized sheathing, armoring, and materials to maintain communication integrity during fire, with models varying by structure, fire-resistance rating, and application environment. Key Models and DesignsFLOWGUARD™ Fire-Resistant Optical Cables These cables feature reinforced plastic (FRP) armoring for flexibility, low bending radius, and rodent protection. They are waterproof, operate across wide temperature ranges, and support up to 12 fibers per bundle, making them suitable for indoor and outdoor communication networks.

Ceramic Sheathing Flame-

Retardant Cables Developed with a cable core wrapped in two-sided synthetic mica tape, an inner sheath packed with ceramic sheathing materials, steel wire armor, and an LSZH outer sheath. These cables achieve high flame resistance, with LOI up to 40% and temperature index up to 370°C. They maintain optical fiber attenuation under extreme fire conditions (up to 950°C) and comply with IEC60332 and BS6387 standards, ideal for subways, tunnels, and rail transport.

APA

R Fire-Resistant/Survival Cables These cables use steel wire braiding or corrugated steel tape armor, with fibers in gel-filled loose tubes around a central strength member. They are LSZH and FR-sheathed, supporting single-mode (G652. D, G657 A, G655) and multi-mode (OM1–OM4) fibers.

They ensure operation for up to 3 hours in fires up to 750°C, suitable for emergency communication systems in public buildings, tunnels, and metro lines.

ETK Kablo B2ca-

Classified Cables Certified to B2ca CPR and FE180 standards, these cables maintain optical integrity under extreme heat and flame. They provide low smoke emission, zero halogen content, and mechanical durability, suitable for tunnels, hospitals, airports, industrial plants, and data centers. B2ca classification ensures very high fire performance with limited heat release and flame spread.

Stainless Steel Wrinkled Optical Unit Cables This model incorporates a stainless steel wrinkled optical unit filled with waterproof fiber pastes, offering compact structure, small diameter, and light weight. It provides flame retardancy, fire resistance, cold resistance, ozone and chemical resistance, low-temperature flexibility, and heat stability, suitable for communication and data transmission in harsh environments.

Applications

Subway and railway communication networksTunnels and underground infrastructureHospitals, airports, and industrial plantsEmergency and fire alarm systemsData centers and critical communication linesStandards and PerformanceIEC60332-1/3: Single and multiple cable flammabilityIEC60331: Circuit integrity under fireBS6387: Fire resistance with water and mechanical shockCPR B2ca: High reaction-to-fire performanceLSZH/FRLS: Low smoke, zero halogen, and flame retardant properties These models ensure continuous data transmission during fire, protect personnel and equipment, and meet stringent international safety standards, making them essential for critical communication infrastructure.

Flame-Retardant Optical Cables Specifications and Models

In this article, we will explore the specifications and models of flame-retardant optical cables from four different aspects: construction materials, flame retardancy standards, cable types, and application

Fire resistant optical bre cables

These multi micromodule cables are designed for indoor/outdoor installation in tunnel infrastructure, and public building such as hospitals, railway stations, airports,...and more.

Fire resistant/survival cables

Our fire resistant/fire survival cables feature a steel wire/steel wire braiding/corrugated steel tape armour to provide mechanical strength. Optical cables used in vital communication and emergency systems

Fire Resistant Fiber Optic Cables CPR B2ca | ETK Kablo

Our fire-resistant fiber optic cables ensure data continuity in critical infrastructure worldwide, helping integrators, contractors, and telecom operators meet the highest CPR and IEC standards.

Flame-retardant optical cable

Find your flame-retardant optical cable easily amongst the 50 products from the leading brands (LEMO, LAPP, YOCF, ...) on DirectIndustry, the industry

CPR Optical Cables | Fire-Resistant | OPTRAL

CPR fire-resistant optical cables with Euroclass Dca, Cca, and B2ca classifications. Safety and performance for critical applications.

Huijue Drop Cable 2-Core Multi Mode/Single Mode Optical Fiber CE ...

Huijue Drop Cable 2-Core Multi Mode/Single Mode Optical Fiber CE Certified Easy-Strip for FTTH/Indoor Networking Wiring

Swiss direct fusion optical cable terminal box Germany

All Companies and suppliers for swiss-direct-fusion-optical-cable-terminal-box Find wholesalers and contact them directly Leading B2B martketplace Find companies now!

Flame-Retardant Optical Cables Specifications and Models

© 2026 METRA FIBER MARKET - All rights reserved

Flame-retardant optical cables are an essential component in the telecommunications industry, ensuring the safety and reliability of data transmission. These cables are designed to resist fire and prevent

LSZH Flame Retardant GYTA33 Fiber Optic Cable SWA Steel Wire

Fire-Safe Flame Retardant LSZH Jacket: Encased in a high-grade Low Smoke Zero Halogen (LSZH) outer sheath. In a fire hazard, it self-extinguishes, emits minimal smoke, and releases zero toxic

Flame-Retardant Optical Cable Specification and Model

Specification and Model of Flame-Retardant Optical Cable Flame-retardant optical cables are an essential component in the telecommunications industry, ensuring the safe and efficient transmission

High Voltage Flame Retardant Optical Cable-YOFC | Smart Link

Products High Voltage Flame Retardant Optical Cable High voltage cables require transmission control cables to have good electromagnetic radiation resistance, high voltage breakdown resistance,

Fiber Optic Cables

APPLICATION Optical cable for indoor and outdoor use in vital communication and emergency systems that need to be operational during fire. The cable has a design that ensures operation for more than

Fire Resistant Fiber Optic Cables CPR B2ca | ETK Kablo

Which fibre is resistant to fire? The glass optical fibre itself is non-flammable; what determines fire behaviour is the cable construction (insulation, sheath, fillers). For fire-critical areas, choose fire

25-year best-selling non-metallic flame-retardant optical cable gyftzy ...

As shown in the table above, gyftzy optical cables are comprehensively superior to traditional models in key performance indicators and are the "safety first choice" in outdoor

Fire resistant optic fibre cable_V4

© 2026 METRA FIBER MARKET - All rights reserved

OPTIC FIBRE CABLES In case of fire, the communication networks, emergency systems and other key equipment''s are essential to stay functional. APAR has developed Fire Resistant (Fire Survival) Fibre

Development of flame retardant and fire-resistant optical cable based ...

Light transmittance of flame retardant and fire-resistant optical fiber cable is more than 68% according to IEC61034. According to IEC60331-11/25, maximum change in attenuation of optical fibers is 0.16dB
